

## Heavy Duty Pallet Rack Upright Roll Forming Machine For Galvanized Steel Storage Solutions

### Our Product Introduction

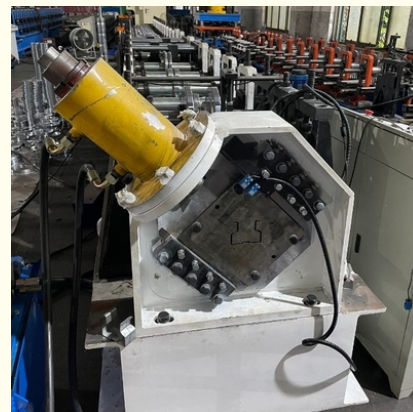

#### Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Storage Shelf Rack
- Minimum Order Quantity: 1 SET
- Price: USD30000-USD55000
- Packaging Details: Nude Packaging in a 40 feet container
- Delivery Time: 60 work days
- Payment Terms: T/T, , L/C
- Supply Ability: 30 sets per month

#### Product Specification

- Condition: New
- Materials: PPGI/GI
- Driven Type: Gearbox
- Machine Name: Pallet Rack Upright Roll Forming Machine
- Operating Thickness: 2.0-3.0mm
- Cutting Blade Material: CrMov12, HRC58-62
- Function: Shelf Panel, Upright, Beam
- Coil Type: Galvanized Steel
- Highlight: **Heavy Duty Rack Upright Roll Forming Machine, Pallet Rack Upright Roll Forming Machine**

## Product Description

### Heavy Duty Pallet Rack Upright Roll Forming Machine For Galvanized Steel Storage Solutions

#### Product Description:

This storage rack roll forming machine is equipped with the latest technology and is made from high-quality materials that ensure the longevity of the machine. The machine is designed to work with galvanized steel coils, which are known for their strength and durability. This means that the final product is strong enough to hold heavy loads and is resistant to corrosion and rust.

The driven type of this machine is a gearbox, which ensures that the machine runs smoothly and efficiently. This gearbox is reliable and offers a high level of precision, which means that the final products are of the highest quality.

The function of this machine is to produce shelf panels, uprights, and beams, which are used to create the storage racks. The shelf panels are the horizontal parts of the storage racks, while the uprights are the vertical parts. The beams are the parts that connect the shelf panels and uprights together.

Our heavy-duty storage rack roll forming mill is perfect for companies that need to produce a large number of storage racks quickly and efficiently. This machine is easy to operate and requires minimal maintenance, which means that it is a cost-effective solution for companies that need to produce storage racks on a regular basis.

In summary, our new storage rack production line is designed to produce high-quality shelf-standing racks, beams, and shelf panels quickly and efficiently. The storage rack roll forming machine is made from high-quality materials and is designed to work with galvanized steel coils. The driven type of the machine is a gearbox, which ensures that the machine runs smoothly and efficiently. The function of the machine is to produce shelf panels, uprights, and beams, which are used to create the storage racks. This heavy-duty storage rack roll forming mill is perfect for companies that need to produce a large number of storage racks quickly and efficiently.

#### Features:

Product Name: Storage Rack Roll Forming Machine

Coil Type: Galvanized Steel

Punching: 1 Set, 110T

Function: Shelf Panel, Upright, Beam

Condition: New

Materials: PPGI/GI

#### Technical Parameters:

|                        |  |
|------------------------|--|
| Machine Name           | Pallet Rack Upright Roll Forming Machine |
| Operating Thickness    | 2.0-3.0mm                                |
| Punching               | 1 Set, 110T                              |
| Driven Type            | Gearbox                                  |
| Materials              | PPGI/GI                                  |
| Export Market          | Global                                   |
| Final Product          | Shelf Standing Rack,Beam,Shelf Panel     |
| Function               | Shelf Panel,Upright,Beam                 |
| Coil Type              | Galvanized Steel                         |
| Cutting Blade Material | CrMov12,HRC58-62                         |

### Applications:

Equipped with a 110T punching set and cutting blade material made of CrMov12 with a hardness of HRC58-62, the Storage Rack Roll Forming Machine is capable of producing high-quality storage racks for various industrial applications. This machine is in new condition, ensuring reliable performance and consistent output.

The Storage Rack Roll Forming Machine is ideal for use in scenarios such as warehouses, factories, and distribution centers. The machine is perfect for mass production of storage racks, which can be used for storing goods and materials in an organized and efficient manner. The production line can also be used to produce customized storage racks to meet specific storage requirements.

The Storage Rack Roll Forming Machine's versatility makes it suitable for use in various industries such as logistics, manufacturing, and construction. It can produce storage racks of different sizes and shapes, making it adaptable to different storage needs.

In conclusion, the Hangzhou Maxwell Storage Rack Roll Forming Machine is an excellent investment for any industrial storage rack roll forming plant. Its durability, efficiency, and versatility make it an indispensable tool for any storage rack production line. Whether you're a small business owner or a large corporation, this machine will help you produce high-quality storage racks that meet your specific requirements.

### Support and Services:

The Storage Rack Roll Forming Machine is a highly efficient and durable machine designed to produce storage rack components with precision and consistency. Our technical support and services for this product include:

[Installation and set-up assistance](#)

[User training and education](#)

[Regular maintenance and repairs](#)

[Upgrades and customization options](#)

[24/7 remote technical support](#)

Our team of experienced technicians is dedicated to ensuring that your Storage Rack Roll Forming Machine is operating at peak performance levels at all times. We are committed to providing you with the highest level of customer service and support to help you get the most out of your investment.

### Packing and Shipping:

Product Packaging:

[The storage rack roll forming machine will be packaged in a wooden crate for maximum protection during shipping.](#)

[All parts and components will be securely fastened and wrapped in foam to prevent any damage during transit.](#)

Shipping:

[The storage rack roll forming machine will be shipped via a reputable carrier to ensure timely and safe delivery.](#)

[Delivery times may vary depending on the destination, but we will provide tracking information to monitor the shipment's progress.](#)

[Customers are responsible for any import duties or taxes that may be incurred during the shipping process.](#)
