

Customized Round Gutter Downspout Roll Forming Machine 15m/Min Speed

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Downspouts
- Minimum Order Quantity: 1 Set
- Price: USD12000--USD30000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Color: Customizable
- Thickness: 0.4-0.6mm
- Voltage: 380V/50Hz/3Phase
- Forming Stations: 13 Stands
- Roller Material: GCr15 Bearing Steel With Quench Treatment, HRC58-62
- Speed: 15m/min
- After-Sales Service: Engineers Available To Service Machinery Overseas
- Shaft Material: NO.45 Fine Steel
- Highlight: Round Gutter Downspout Roll Forming Machine

Product Description

Customizable Color Round Gutter Downspout Roll Forming Machine 15m/Min Speed

Product Description:

The Half Round Gutter Machine is a state-of-the-art roll forming machine specifically designed for producing half-round gutters. This machine is ideal for manufacturing seamless half-round gutters from materials such as aluminum, steel, and copper.

This half round downspout roll forming machine is easy to operate and maintain, which makes it an excellent choice for businesses of all sizes. The machine is designed to be durable and long-lasting, which ensures that it will provide many years of reliable service. The machine is also designed to be energy efficient, which helps to reduce energy costs and increase profitability for businesses that use it.

In conclusion, if you are looking for a reliable and high-quality Half round downspout roll forming machine, then this is an excellent choice. It is designed to be efficient, durable, and easy to operate and maintain, which makes it an excellent investment for businesses of all sizes. So, if you want to produce high-quality round gutter downspouts, then this is the machine for you.

Features:

Product Name: Gutter Downspout Roll Forming Machine

Voltage: 380V/50Hz/3Phase

Roller Material: GCr15 Bearing Steel With Quench Treatment,HRC58-62

Main Motor Power: 7.5KW

Forming Stations: 23-26stands

Color: Customizable

This machine is also known as Half round gutter roll forming machine or Metal rain gutter roll forming machine.

Technical Parameters:

Product Name	Downspout and Elbow Roll Forming Machine
Color	Customizable
Material	Steel
Thickness	0.4-0.6mm
Forming Stations	23-26 stands

Control System	PLC
Voltage	380V/50Hz/3Phase
Main Motor Power	7.5KW
Hydraulic Motor Power	15KW
Shaft Material	NO.45 Fine Steel
Roller Material	GCr15 Bearing Steel With Quench Treatment, HRC58-62
Product Name	Round Gutter Downspout Roll Forming Machine
Product Name	Round Downspout Roll Forming Machine

Applications:

The Hangzhou Maxwell Metal rain gutter roll forming machine is equipped with a PLC control system, which ensures precise and efficient control of the machine. The roller material used in this machine is GCr15 bearing steel with quench treatment, HRC58-62. The forming stations in this machine are 23-26 stands, which ensures that the machine can produce high-quality metal rain gutters with ease. The main motor power of this machine is 7.5KW, and the hydraulic motor power is 15KW.

This Metal rain gutter roll forming machine is perfect for use in a variety of different applications. It is ideal for use in residential, commercial, and industrial settings. It can be used to produce high-quality metal rain gutters that are both durable and long-lasting. This machine is also perfect for use in areas that experience heavy rainfall, as it can easily produce round downspouts that are designed to efficiently channel water away from buildings.

The Hangzhou Maxwell Metal rain gutter roll forming machine is a versatile and reliable machine that is perfect for use in a variety of different scenarios. Whether you are a contractor, builder, or homeowner, this machine is sure to meet all of your needs. So why wait? Order your metal rain gutter roll forming machine today and start producing high-quality metal rain gutters that are built to last!

Customization:

Our gutter downspout roll forming machines are highly customizable to meet your specific needs. We offer customization services for both round and square metal downspout roll forming machines. The roller material used in our machines is GCr15 bearing steel with quench treatment, HRC58-62. Our machines have a speed of 15m/min and a voltage of 380V/50Hz/3Phase. We also offer after-sales service with engineers available to service machinery overseas.

If you're looking for a reliable and efficient gutter downspout roll forming machine, Hangzhou Maxwell is the right choice for you. Contact us today to learn more about our products and customization services.

Payment terms for our machines include T/T and L/C. Choose Hangzhou Maxwell for your next round downspout roll forming machine or square downspout roll forming machine.

Support and Services:

The Gutter Downspout Roll Forming Machine is a high-quality piece of equipment designed to streamline the production of gutter downspouts. Our technical support team is available to assist with any questions or concerns you may have during the installation and operation of the machine. In addition, we offer a range of services to ensure the ongoing performance and maintenance of your equipment including:

Regular maintenance and servicing

Replacement parts and accessories

Training for operators and maintenance staff

Upgrades and modifications

Our goal is to provide you with the highest level of support and service to help you get the most out of your investment in our equipment.

Packing and Shipping:

Product Packaging:

The Gutter Downspout Roll Forming Machine is securely packaged in a wooden crate to protect it during shipping.

All parts are carefully wrapped in bubble wrap to prevent damage during transportation.

The crate is labeled with the product name and specifications for easy identification.

Shipping:

The Gutter Downspout Roll Forming Machine is shipped via sea freight to the customer's desired port.

Shipping costs are calculated based on the destination and weight of the machine.

Customers will receive a tracking number to monitor the status of their shipment.

Delivery times may vary depending on the location of the customer.
