

Hydraulic Cutting Scaffolding Roll Forming Machine 12T With GCr15 Bearing Steel

Our Product Introduction

For more products please visit us on roll-formermachines.com

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Scaffold board
- Minimum Order Quantity: 1 Set
- Price: USD50000--USD180000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 20 Set per Mon

Product Specification

- Plc: Mitsubishi/ Panasonic/ Siemens
- Weight: 12T
- Rolling Thickness: 1.5-1.8mm
- Condition: New
- Material Of Rollers: GCr15 Bearing Steel With Quench Treatment
- Key Selling Points: High Productivity
- Cutting System: Hydraulic Cutting
- Type: Tile Forming Machine, Fully Automatic
- Name: Scaffolding Roll Forming Machine
- Highlight: **Hydraulic Cutting Scaffolding Roll Forming Machine**
, Scaffolding Roll Forming Machine 12T

Product Description

Productivity Hydraulic Cutting Scaffolding Roll Forming Machine With GCr15 Bearing Steel

Product Description:

This Scaffolding Machine is brand new, ensuring that it is in excellent condition and ready to deliver high productivity immediately. The power supply for this machine is 380V/50Hz, a standard voltage for industrial machinery in many countries.

One of the key selling points of this Scaffolding plank roll-forming machine is its high productivity. This machine is designed to produce a large number of scaffolding planks quickly and efficiently, allowing you to meet the demands of your customers without compromising on quality.

In addition to its high productivity, this scaffolding-forming machine is also incredibly versatile. It can produce a wide range of scaffolding plank sizes, allowing you to cater to the specific needs of your customers. Whether you need to produce narrow or wide planks, this machine can easily handle them.

Overall, the Plank Decking Scaffold Boards Roll Forming Machine is an excellent investment for any business that needs to produce high-quality scaffolding planks quickly and efficiently. With its advanced PLC system, durable construction, and high productivity, this machine is sure to increase your production capacity and help you meet the demands of your customers.

Features:

Product Name: Scaffolding Making Machine

Cutting System: Hydraulic Cutting

Power Supply: 380V/50Hz

Width: 595-600mm

Key Selling Points: High Productivity

Rolling Thickness: 1.5-1.8mm

This Scaffolding Making Machine, also known as Scaffolding Planks Roll Forming Machine or Scaffolding Forming Machine, features a hydraulic cutting system and a width range of 595-600mm. It operates on 380V/50Hz power supply and has a rolling thickness of 1.5-1.8mm, ensuring high productivity and efficiency.

Technical Parameters:

Width	595-600mm
Power Supply	380V/50Hz
Type	Scaffolding Planks Roll Forming Machine, Fully Automatic
PLC	Mitsubishi/ Panasonic/ Siemens
Rolling Thickness	1.5-1.8mm

Cutting System	Hydraulic Cutting
Weight	12T
Material of Rollers	GCr15 Bearing Steel With Quench Treatment
Work Speed	0-15m/min
Condition	New

Applications:

The Scaffolding Forming Machine is certified by CE and ISO9001, ensuring that it meets the highest quality and safety standards. The minimum order quantity for this machine is 1 set, and it is packaged in nude packing in a 40 feet container. The delivery time for the machine is 60 workdays, and it can be paid for using T/T or L/C. The machine has a supply ability of 30 sets per month, making it readily available to customers who need it.

The key selling point of the Scaffolding Forming Machine is its high productivity, which makes it ideal for use in large construction projects where time is of the essence. The machine is powered by a 380V/50Hz power supply and has a width of 595-600mm. It has a work speed of 0-15m/min, making it highly efficient and effective in producing high-quality scaffolding planks. The rollers of the machine are made of GCr15 bearing steel with quench treatment, ensuring that they are durable and long-lasting.

The Scaffolding Forming Machine is ideal for use in various construction projects, including building construction, bridge construction, and other large-scale construction projects where scaffolding is required. The machine is easy to operate and requires minimal maintenance, making it a cost-effective and efficient solution for producing high-quality scaffolding planks.

In conclusion, the Scaffolding Forming Machine is a highly efficient and productive machine that is ideal for use in various construction projects. It is manufactured by Hangzhou Maxwell, a leading brand in the manufacturing of construction equipment and machinery, and is made in Jiangsu, China. The machine is certified by CE and ISO9001, ensuring that it meets the highest quality and safety standards. It has a high productivity level and is easy to operate and maintain, making it a cost-effective and efficient solution for producing high-quality scaffolding planks.

Support and Services:

Our Scaffolding Making Machine product comes with comprehensive technical support and services to ensure maximum efficiency and productivity. Our team of experts is always ready to assist with any technical issues or questions you may have during the installation or operation of the machine.

We also offer regular maintenance and repair services to keep your machine in top condition and minimize downtime. Our technicians are highly trained and experienced in servicing our Scaffolding Machines and will work quickly to resolve any issues to ensure your production line runs smoothly.

In addition, we provide training services to ensure that you and your team are fully trained and knowledgeable about the product and its operation. We offer both on-site and off-site training options to suit your needs.

With our commitment to providing excellent technical support and services, you can trust that your Scaffolding Machine will continue to perform at its best for years to come.

Packing and Shipping:

The Scaffolding Making Machine will be securely packed in a wooden crate to ensure safe transportation. The machine will be disassembled and each part will be carefully wrapped and cushioned with foam to prevent any damage during shipping.

Shipping:

The machine will be shipped via sea freight and the delivery time will vary depending on the destination. The shipping cost will be calculated based on the destination and weight of the shipment. We will provide the customer with a tracking number so they can monitor the progress of their shipment.
