

## Customized Highway Guardrail Roll Forming Machine Manufacturers With Durable Forming Rollers

### Our Product Introduction

#### Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Highway Guardrail
- Minimum Order Quantity: 1 Set
- Price: USD40,000--USD70,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

#### Product Specification

- Market: Export To Global
- Name: Highway Guardrail Roll Forming Machine
- Usage: Highway Guardrail
- Forming Rollers: 45# Steel, Treat Treatment HRC58-60
- Driven: Gearbox
- Warrantee: 1 Year
- Oem: Yes
- Forming Stations: According To You Profile Drawings
- Highlight: **Customized Highway Guardrail Roll Forming Machine**  
**Highway Guardrail Roll Forming Machine Manufacturers**

## Product Description

### Customizable Highway Guardrail Roll Forming Machine With Durable Forming Rollers

#### Product Description:

The **highway Guardrail Roll Forming Machine** is the perfect solution for creating high-quality guardrails for highways. This machine is designed to produce a wave road barrier roll forming machine or Highway Guardrail W beam roll forming machine with ease and efficiency. The machine is built with a sturdy frame and is driven by a gearbox for reliable performance. It can be customized to meet the specific requirements of customers.

The **Control System** of the Highway Guardrail Roll Forming Machine is operated by a PLC. This ensures that the machine operates smoothly and efficiently, without any delays or errors. The PLC also allows operators to monitor the production process and make adjustments as necessary.

As an **OEM** product, the Highway Guardrail Roll Forming Machine is designed to be customized according to the needs of customers. This means that each machine can be tailored to meet specific requirements, such as the size and shape of the guardrails being produced.

The Highway Guardrail Roll Forming Machine is designed for **export to global markets**. It is built to meet international standards and can be configured for different power supply requirements. This makes it an ideal choice for customers who require a reliable and efficient machine for producing highway guardrails.

In summary, the Highway Guardrail Roll Forming Machine is a powerful and reliable machine that is perfect for producing high-quality guardrails for highways. It is designed to produce two two-wave road barrier roll forming machines or Highway Guardrail W beam roll forming machines with ease and efficiency. The machine is driven by a gearbox for reliable performance, and the control system is operated by a PLC for smooth and efficient operation. As an OEM product, it can be customized to meet the specific requirements of customers. And, it is designed for export to global markets, making it an ideal choice for customers who require a reliable and efficient machine for producing highway guardrails.

#### Features:

Product Name: Highway Guardrail Roll Forming Machine

Applicable Industries: Building Material Shops, Manufacturing Plant, Machinery Repair Shops, Construction Works

Raw Material: PPGI, PPGL, GI, Color Steel

Oem: Yes

Name: Highway Guardrail Roll Forming Machine

Control System: PLC

#### Technical Parameters:

Two waves road barrier highway express guardrail machine Highway guardrail roll forming machine	
Suitable Material	GI/PPGI/AL
Coil Thickness	2.5-4 mm
Feeding width	490 mm
Cover width	312 mm
Coil inner diameter	508 mm
Maximum speed	15m per minute
Power	30KW

### Applications:

The Highway Guardrail W beam roll forming machine is suitable for a variety of industries, including building material shops, manufacturing plants, machinery repair shops, and construction works. With a minimum order quantity of 1 set, this product is perfect for both large-scale and small-scale projects.

The forming rollers of this machine are made of 45# steel and have undergone heat treatment to achieve a hardness of HRC58-60. This ensures that the rollers are durable and can withstand heavy use over a long period. The forming stations of the machine can be customized according to the profile drawings provided by the customer.

The Highway Guardrail W beam roll forming machine is equipped with hydraulic cutting, which allows for precise and efficient cutting of the guardrails. This product is designed for export to global markets and is packaged in a 40-foot container for safe and secure transportation.

Hangzhou Maxwell guarantees a delivery time of 60 workdays and offers payment options of T/T and L/C. With a supply ability of 30 sets per month, customers can rest assured that they will receive their products promptly.

In summary, the Highway Guardrail Roll Forming Machine offered by Hangzhou Maxwell is a high-quality product that is suitable for a variety of industries. Its durable construction, customizable forming stations, and efficient cutting make it a popular choice for construction projects around the world.

### Support and Services:

The Highway Guardrail Roll Forming Machine is a highly efficient and reliable piece of equipment designed for the production of highway guardrails. Our technical support team is available to assist with the installation, operation, and maintenance of the machine, ensuring optimal performance and longevity.

We also offer a range of services to our customers, including customized design and production of guardrail profiles, as well as training for operators and maintenance personnel. Additionally, our team can provide troubleshooting and repair services as needed to minimize downtime and keep your production running smoothly.

### Packing and Shipping:

#### Product Packaging:

The Highway Guardrail Roll Forming Machine will be packaged securely to ensure safe delivery. The machine will be wrapped in protective material and placed inside a sturdy wooden crate.

#### Shipping:

The Highway Guardrail Roll Forming Machine will be shipped via a reliable and reputable freight carrier. The shipping cost will be calculated based on the destination and weight of the machine. Customers will be notified of the shipping cost and carrier once the order is confirmed.
