

Galvanized Steel Stud And Track Roll Forming Machine With Servo Following Cut

Our Product Introduction

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Keel machine
- Minimum Order Quantity: 1 Set
- Price: USD95000-USD55000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Cutting Type: Flying Cut (Cut Without Stop)
- Applicable Industries: Building Material Shops, Machinery Repair Shops, Manufacturing Plant, Construction Works
- Forming Speed: 40-45m/min Or Faster
- Rolling Thickness: 0.5-1.0mm (Or As Request)
- Productivity: Approx 45m/min
- Material Type: Galvanized Steel
- Cutting Material: Cr12 Mov
- Key Selling Points: Easy To Operate
- Highlight: **Steel Stud And Track Roll Forming Machine, ISO9001 Stud And Track Roll Forming Machine**

Product Description

Galvanized Steel Stud And Track Roll Forming Machine With Servo Following Cut

Product Description:

The machine features a flying cut type, which allows for cutting without stopping the machine. This increases productivity and reduces waste, saving time and money for the user. With a production speed of approximately 45m/min, this machine is ideal for high-volume production environments.

The Stud and Track Roll Forming Machine is also easy to operate, making it a great choice for both experienced and novice users. Its user-friendly design ensures that even beginners can quickly learn how to use the machine effectively. Additionally, this machine is designed to be low-maintenance, reducing the need for frequent repairs and upkeep.

Whether you need to produce furring channels, steel frames, or purlins, the Stud and Track Roll Forming Machine is a reliable and efficient choice. Its galvanized steel construction and flying cut type make it a durable and productive machine that can withstand heavy use and deliver consistent results. With its easy-to-use design and fast production speed, this machine is an ideal choice for any industrial setting.

Features:

Product Name: Stud And Track Roll Forming Machine

Productivity: Approx 45m/min

Cutting type: Flying Cut(Cut Without Stop)

Punching hole: Flying Punch

Key Selling Points: Easy To Operate

Applicable Industries: Building Material Shops, Machinery Repair Shops, Manufacturing Plant, Construction Works

Product Type: Track Roll Forming Line and Equipment

Also known as: Drywall Profile Roll Forming Machine

Technical Parameters:

| | |
|------------------------|--|
| Forming Speed | 40-45m/min Or Faster |
| Productivity | Approx 45m/min |
| Punching hole | Flying Punch |
| Machine Control System | Fully Auto PLC Controlling |
| Applicable Industries | Building Material Shops, Machinery Repair Shops, Manufacturing Plant, Construction Works |
| Cutting Material | Cr12 Mov |
| Type | Steel Frame & Purlin Machine |
| Key Selling Points | Easy To Operate |
| Material Type | Galvanized Steel |
| Cutting type | Flying Cut (Cut Without Stop) |

Applications:

Our Stud and Track Roll Forming Machines are easy to operate and are suitable for various industries such as building material shops, machinery repair shops, manufacturing plants, and construction works. The machine has a productivity of approximately 45m/min and a forming speed of 40-45m/min or faster. The rolling thickness of our machines ranges from 0.5-1.0mm or as per the customer's request. The Metal Stud Roll Forming Machine is a perfect choice for creating metal studs that are used in framing walls and other structures. It is an ideal choice for builders, contractors, and construction companies. The Furring Channel Roll Forming Machine is suitable for creating furring channels that can be used for a variety of purposes such as supporting suspended ceilings, installing drywall, and creating soundproof walls.

Our Stud and Track Roll Forming Machines are perfect for various application occasions and scenarios. They can be used in the construction of residential and commercial buildings, hotels, hospitals, schools, and other structures. They are also suitable for creating metal frames for windows and doors. The machines can be used for both indoor and outdoor projects and are highly durable and reliable.

Support and Services:

The Stud And Track Roll Forming Machine is a high-quality product that is designed to create metal studs and tracks for use in construction projects. This machine is equipped with advanced technology that ensures accurate and consistent results, making it a reliable choice for professionals in the industry.

Our technical support team is available to assist with any questions or concerns you may have about the operation or maintenance of your Stud And Track Roll Forming Machine. We offer comprehensive training and guidance to ensure that you get the most out of your investment.

In addition to technical support, we also offer a range of services to keep your machine running smoothly. These include regular maintenance and repair, as well as upgrades and modifications to meet your evolving needs.

Packing and Shipping:

Product Packaging:

The Stud And Track Roll Forming Machine will be packaged securely in a wooden crate to ensure it arrives in excellent condition. The crate will be lined with foam to absorb any shocks during shipping, and the machine will be securely fastened inside the crate to prevent any movement.

Shipping:

The Stud And Track Roll Forming Machine will be shipped via a reliable and reputable freight carrier. The carrier will be chosen based on their track record for timely and safe delivery. The machine will be insured during shipping to protect against any damage or loss that may occur during transit.
