

220V Steel Hydraulic High Speed Glazed Tile Roll Forming Machine With PLC Control System

Basic Information

Place of Origin: Zhejiang,China
 Brand Name: Hangzhou Maxwell
 Certification: CE,ISO9001
 Model Number: Roof Panel

 Minimum Order Quantity: 1 Set

• Price: USD25000-USD55000

• Packaging Details: Nude Packing In a 40 Feet Container

Delivery Time: 60 workdaysPayment Terms: T/T;L/C

• Supply Ability: 30 Set per Mon

Product Specification

Name: Glazed Tile Roll Forming Machine

Warranty: 1 Year
Cutting Type: Hydraulic
Voltage: 220V
Material: Steel
Control System: PLC

Rolling Speed: 10-25m/minPower Source: Electric

• Highlight: 220V Glazed Tile Roll Forming Machine,

Product Description

Product Description:

With a rolling speed of 10-25 meters per minute, these machines are efficient and produce high-quality results in a short amount of time. This is perfect for businesses that need to produce large quantities of roofing and wall panels quickly and without sacrificing quality. The wall panel roll forming unit is particularly useful for producing flat or corrugated wall panels in a variety of widths and thicknesses. These machines are designed with the user in mind, featuring easy-to-use controls and a compact design that makes it easy to move around the workspace. The machines operate on a standard 220V voltage, making them compatible with most electrical systems. Our Roll Former Machines come with a 1-year warranty, ensuring that you can rely on their performance and durability. We stand behind our products and are committed to providing our customers with high-quality equipment that meets their needs. Investing in a steel roofing roll former or wall panel roll forming unit is a smart decision for any construction or roofing business. These machines can improve your productivity and output, allowing you to take on larger projects and complete them faster. Contact us today to learn more about our Roll Former Machines and how they can benefit your business.

Features:

Product Name: High-speed Glazed Tile Roll Former Machines

Power Source: Electric Voltage: 220V Control System: PLC Thickness: 0.3-0.8mm

Material: Steel Features:

Wall panel roll forming unit

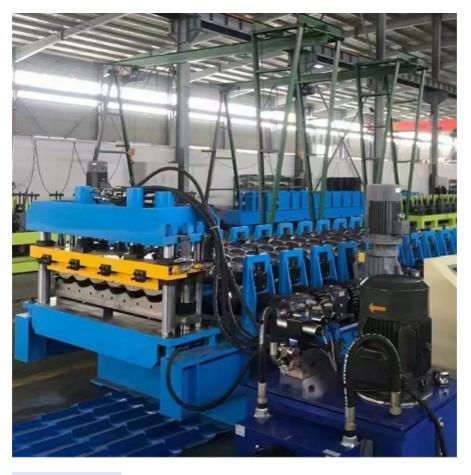

Steel roofing roll former

Corrugated sheet roll forming mill

Technical Parameters:

Technical Parameter	Description
Product Name	Corrugated Sheet Roll Forming Mill
Material	Steel
Thickness	0.3-0.8mm
Rolling Speed	10-15m/min
Application	Roofing and Wall Cladding
Cutting Type	Hydraulic
Control System	PLC
Frequency	50Hz
Voltage	220V
Power Source	Electric
Warranty	1 Year

Applications:

The wall panel roll forming unit is one of the most popular products of Hangzhou Maxwell. With its advanced PLC control system, this machine is suitable for producing wall panels of different sizes and shapes. The wall panel roll forming unit is widely used in construction projects, such as building houses and commercial buildings.

The corrugated sheet roll forming mill is another popular product of Hangzhou Maxwell. This machine is used for producing corrugated sheets that are widely used in roofing and wall cladding applications. The corrugated sheet roll forming mill is suitable for producing sheets of different widths and thicknesses. It is also equipped with an advanced PLC control system, which makes it easy to operate. The corrugated sheet roll forming mill is also widely used in the manufacturing industry. This machine is ideal for producing sheets that are used in the automotive industry, such as car bodies and roofs. The machine is also used in the packaging industry, where corrugated sheets are used to make boxes and other packaging materials.

The minimum order quantity for these machines is 1 set, and the packaging details are nude packing in a 40-foot container. The delivery time is 60 workdays, and the payment terms are T/T and L/C. The supply ability is 30 sets per month, which shows that Hangzhou Maxwell can meet the demands of its customers.

The power source for these machines is electric, and the frequency is 50Hz. The machines are made of high-quality steel, which ensures their durability and longevity. The voltage for these machines is 220V, which is suitable for most countries.

Support and Services:

Our Roll Former Machines come with comprehensive technical support and services to ensure that you get the most out of your purchase. Our team of experts is available to assist with installation, training, maintenance, and repairs.

We offer on-site training to ensure that your operators are fully trained and equipped to operate the machines safely and efficiently. Our technical support team is available to answer any questions or concerns you may have about your machine.

In addition, we provide maintenance and repair services to keep your machine running smoothly. Our team of technicians is trained to quickly diagnose and fix any issues that may arise, minimizing downtime and maximizing productivity.

At Roll Former Machines, we are committed to providing excellent customer service and support. Contact us today to learn more about our technical support and services.

Packing and Shipping:

Product Packaging:

All Roll Former Machines will be packed in wooden crates or boxes for safe transportation.

The machines will be wrapped with protective materials to prevent damage during shipping.

Each machine will be labeled with its model number and serial number for easy identification.

Shipping:

Roll Former Machines will be shipped via sea or air freight depending on customer preference.

Shipping costs will be calculated based on the weight and volume of the machines, as well as the shipping method chosen.

Customers will be provided with a tracking number to monitor the status of their shipment.

Delivery times will vary depending on the shipping method chosen and the destination country.
