Decking Floor / Wall Panel Double Layer Roll Forming Machine For PPGL PPGI AL Tiles

Our Product Introduction

For more products please visit us on roll-formermachines.com

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Roof Panel
- Minimum Order Quantity: 1 Set
- Price: USD24000-USD35000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

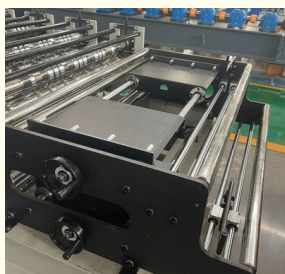

Product Specification

- Tile Type: Colored Glazed Steel
- Roller Material: NO.45 FineSteel With Quench Treatment
- Material: PPGL; PPGI; AL
- Production Speed: 10-15 Meters Per Minute (as Your Require)
- Power Supply: 380V, 50Hz, 3 Phase
- Roller Stations: 13-18 Stations
- Warranty: 1 Year
- Cutting Method: Hydraulic Cutting
- Highlight: **Decking Floor Double Layer Roll Forming Machine**
, Wall Panel Double Layer Roll Forming Machine
, ISO9001 Decking Floor Roll Forming Machine

Product Description

Decking Floor And Wall Panel Double Layer Roll Forming Machine For PPGL PPGI AL Tiles With Hydraulic Cutting

Product Description:

The production speed is highly efficient, with a range of 10-15 meters per minute, as per your requirements. This ensures a high volume of production within a shorter period of time, thus increasing productivity and profitability.

The roller material of the machine is made of NO.45 fine steel with quench treatment, which makes it durable and long-lasting. The machine can withstand high pressure and temperature, ensuring that it maintains its quality and efficiency over time.

The main frame material used in the machine is 350H steel, which is a high-quality material that provides the necessary strength and stability to the machine. This ensures that the machine operates smoothly and efficiently, without any interruptions or breakdowns.

The Floor Decking and Wall Panel Double Layer Roll Forming Machine is highly reliable and comes with a warranty of 1 year. This ensures that any defects or issues that may arise during the warranty period can be addressed promptly and efficiently, without any additional costs.

This machine is ideal for producing metal sheets used in various industries, such as floor decking and wall panel. Its efficiency, durability, and reliability make it an investment worth considering for any business looking to increase its production capacity and profitability.

Features:

Product Name: Doble Layer Metal Sheet Roll Forming Machine

Forming Method: Roll Forming

Tile Type: Colored Glazed Steel

Cutting Tolerance: ± 2 mm

Roller Stations: 13-18 Stations

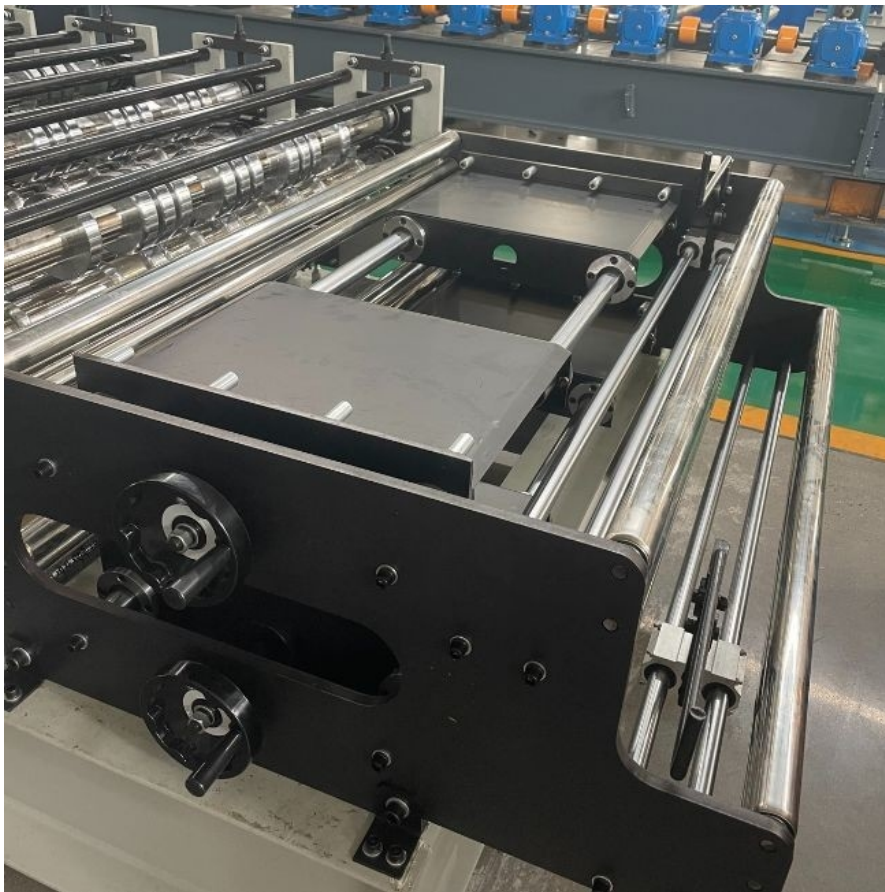

Control System: PLC Control

Our Double layer roof sheet roll forming machine can produce Glazed tile and corrugated panel Roll Forming Machine products using the Roll Forming method with Colored Glazed Steel material. With a cutting tolerance of ± 2 mm and 13-18 roller stations, this machine is designed to be efficient and accurate. The PLC control system ensures precise and reliable operation.

Technical Parameters:

Product Name	Double layer roof sheet roll forming machine
Applicable Industries	Hotels, Garment Shops, Building Material Shops, Construction Works, Advertising Company, Manufacturing Plant, Food & Beverage Factory, Retail, Others
Production Speed	10-15 Meters Per Minute (as Your Require)
Warranty	1 Year
Tile Type	Colored Glazed Steel
Material	PPGL; PPGI; AL
Power Supply	380V, 50Hz, 3 Phase
Roller Material	NO.45 Fine Steel With Quench Treatment
Control System	PLC Control
Roller Stations	13-18 Stations
Cutting Method	Hydraulic Cutting
Product Name	Floor Decking and Wall Panel Doble Layer Roll Forming Machine

Applications:

The Metal Sheet Roll Forming Machine is made of high-quality materials such as PPGL, PPGI, and AL. It also features a PLC control system that ensures the precision and accuracy of the product. The production speed of this machine is 10-15 meters per minute, which can be adjusted as per your requirement. The roller material used in this product is NO.45 fine steel with quench treatment, making it durable and long-lasting. The main frame material of this product is 350H steel, which provides stability and strength to the machine. This product is ideal for a variety of applications such as the production of double layer roof sheets, floor decking, and wall panels using the Double Layer Roof Sheet Roll Forming Machine. The Floor Decking and Wall Panel Double Layer Roll Forming Machine is ideal for producing metal sheets that can be used for construction purposes. The Glazed Tile and Corrugated Panel Roll Forming Machine is ideal for producing metal sheets that can be used for roofing purposes. This product is widely used in the construction industry, and it is highly recommended for those who are looking for a reliable and high-quality metal sheet roll forming machine.

Packing and Shipping:

Product Packaging:

The metal sheet roll forming machine will be securely packaged in a wooden crate to ensure safe transportation and delivery.

All parts and accessories will be properly labeled and organized within the crate for easy assembly.

The crate will be sealed and wrapped with protective materials to prevent any damage during transit.

Shipping:

The metal sheet roll forming machine will be shipped via a reliable carrier service.

The shipping cost will be calculated based on the destination and weight of the package.

The estimated delivery time will be provided to the customer once the order is confirmed.

The customer will be provided with a tracking number to monitor the progress of the shipment.
