

PLC Controlled Gutter Downspout Roll Former Machines 10m/Min-20m/Min

Our Product Introduction

For more products please visit us on roll-formermachines.com

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Gutter Downspout
- Minimum Order Quantity: 1 Set
- Price: USD15000--USD35000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Control System: PLC
- Production Speed: 10-20 Meters Per Minute
- Cutting Type: Hydraulic Cutting
- Main Motor Power: 5.5 KW
- Cutting Blade Material: Cr12Mov
- After-Sales Service: Engineers Available To Service Machinery Overseas
- Product Type: Roll Forming Machine
- Hydraulic Power: 3 KW
- Highlight: **Gutter Downspout Roll Former Machines, PLC Controlled Roll Former Machines, Roll Former Machines 10m/Min**

Product Description

PLC Controlled Gutter Downspout Roll Forming Machine With Hydraulic Cutting 10-20 Meters Per Minute Production Speed

Product Description:

This Roll Forming Machine is the perfect choice for manufacturers who demand the highest level of quality and precision from their equipment. Whether you are producing downspouts or other complex parts, this machine delivers exceptional results every time. One of the standout features of this Roll Forming Machine is its powerful main motor, which has a power rating of 5.5 KW. This ensures that the machine can handle heavy workloads and maintain consistent performance over time, even in demanding manufacturing environments.

In addition to its impressive performance capabilities, the Downspout Roll Forming Machine also comes with comprehensive after-sales service. This includes access to engineers who are available to service the machinery overseas, ensuring that your equipment remains in top condition no matter where you are located.

Overall, the Downspout Roll Forming Machine is an excellent choice for any manufacturer looking to improve their production capabilities and achieve exceptional results. With its advanced features, high-quality construction, and reliable performance, this machine is sure to exceed your expectations and provide many years of dependable service.

Features:

Product Name: Roll Former Machines

Production Speed: 10-20 Meters Per Minute

After-Sales Service: Engineers Available To Service Machinery Overseas

Material Type: Steel

Roller Material: Cr12

Main Motor Power: 5.5 KW

Downspout Roll Forming Machine

Our Roll Former Machines are perfect for creating high-quality downspouts with speed and precision. With a production speed of 10-20 meters per minute, you can be sure that your production line will keep up with demand. Our engineers are available to service machinery overseas, ensuring that your machine stays in top condition for years to come. Made with durable steel and high-quality Cr12 roller material, our Roll Former Machines are built to last. The main motor power of 5.5 KW ensures that your machine has the power it needs to get the job done right.

Technical Parameters:

Production Speed	10-20 Meters Per Minute
Product Type	Roll Forming Machine
Warranty	1 Year
Material Type	Steel
Cutting Type	Hydraulic Cutting
Main Motor Power	5.5 KW
After-Sales Service	Engineers Available To Service Machinery Overseas
Roller Material	Cr12
Control System	PLC
Voltage	380V/50Hz/3Phase

Applications:

The voltage of the Roll Former Machine is 380V/50Hz/3Phase, and it has 12 roller stations. The main motor power is 5.5KW, and the roller material is Cr12, making it suitable for producing high-quality downspouts. The after-sales service for the Roll Former Machine is excellent, with engineers available to service machinery overseas, ensuring that customers receive prompt and efficient support if they require it.

The Hangzhou Maxwell Downspout Roll Forming Machine is suitable for various product application occasions and scenarios. The Roll Former Machine is ideal for use in construction sites, where downspouts are required to channel water away from buildings. The Roll Former Machine is also suitable for use in factories, where the production of downspouts is required for use in various products. The Roll Former Machine is versatile and can produce downspouts of various sizes and shapes, making it suitable for use in various industries. The Hangzhou Maxwell Downspout Roll Forming Machine is a high-quality product that is built to last. It is easy to use and produces high-quality downspouts with precision and accuracy. The Roll Former Machine is an excellent investment for businesses that require the production of downspouts, as it is efficient, reliable, and cost-effective.

Support and Services:

Our Roll Former Machines are designed and manufactured to the highest standards to ensure reliable and efficient performance. We offer comprehensive technical support and services to assist our customers in maintaining and optimizing their equipment. Our team of experienced technicians is available to answer any questions and provide guidance on troubleshooting and maintenance. We also provide training services to ensure that our customers are equipped with the knowledge and skills necessary to operate our machines safely and effectively. Our commitment to customer satisfaction means that we are dedicated to providing top-quality technical support and services to help our customers get the most out of their Roll Former Machines.

Packing and Shipping:

Product Packaging:

The Roll Former Machines will be packaged securely in heavy-duty cardboard boxes to protect them during shipping. Each machine will be disassembled and placed inside the box along with all necessary components, accessories, and manuals. The box will be clearly labeled with the product name, model number, and any other relevant information.

Shipping:

Shipping will be arranged by the seller and will be sent via a reliable and reputable shipping carrier. The shipping cost will be calculated based on the destination and weight of the package. The estimated delivery time will be provided to the buyer upon confirmation of the order. The shipping carrier will provide tracking information so that the buyer can monitor the status of their shipment.
