

## Hydraulic Cutting Steel Scaffold Plank Roll Forming Machine With Mitsubishi PLC

### Our Product Introduction

#### Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Scaffold board
- Minimum Order Quantity: 1 Set
- Price: USD25000-USD95000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

#### Product Specification

- Type: Tile Forming Machine, Fully Automatic
- Name: Metal Walk Platform Steel Scaffolding Plank Board Roll Forming Machine
- Plc: Mitsubishi/ Panasonic/ Siemens
- Key Selling Points: High Productivity
- Work Speed: 0-15m/min
- Power Supply: 380V/50Hz
- Material Of Rollers: GCr15 Bearing Steel With Quench Treatment
- Cutting System: Hydraulic Cutting
- Highlight: **Hydraulic Cutting Scaffold Plank Roll Forming Machine**  
**, Steel Scaffold Plank Roll Forming Machine**

## Product Description

### Productivity Hydraulic Cutting Steel Scaffolding Plank Board Roll Forming Machine with Mitsubishi PLC

#### Product Description:

The Plank Decking Scaffold Boards Roll Forming Machine has a work speed of 0-15m/min, making it capable of producing a large number of high-quality scaffolding planks quickly and efficiently. With its fully automatic design, this machine is easy to use and requires minimal operator input, making it an ideal choice for companies looking to streamline their production process and increase efficiency. Whether you're in the business of building scaffolding or need high-quality plank decking for your construction projects, the Scaffolding Planks Roll Forming Machine is an excellent investment. With its durable construction, high-speed production capabilities, and fully automatic design, this machine is sure to meet all of your needs and exceed your expectations.

#### Features:

Product Name: Scaffolding Making Machine

Type: Tile Forming Machine, Fully Automatic

Cutting System: Hydraulic Cutting

Material of Rollers: GCr15 Bearing Steel With Quench Treatment

Work Speed: 0-15m/min

Plc: Mitsubishi/ Panasonic/ Siemens

Keywords: Scaffold Plank Roll forming Machine, Scaffolding Planks Roll Forming Machine, Scaffolding Planks Roll Forming Machine

#### Technical Parameters:

|                       |  |
|-----------------------|--|
| Applicable Industries | Building Material Shops, Construction Works, Steel Scaffolding Plank Board |
| Plc                   | Mitsubishi/ Panasonic/ Siemens   |
| Work Speed            | 0-15m/min  |
| Rolling Thickness     | 2.0-3.0mm  |
| Material of Rollers   | GCr15 Bearing Steel With Quench Treatment                                  |
| Key Selling Points    | High Productivity  |
| Name                  | Metal Walk Platform Steel Scaffolding Plank Board Roll Forming Machine     |

|              |                                       |
|--------------|---------------------------------------|
| Condition    | New                                   |
| Type         | Tile Forming Machine, Fully Automatic |
| Power Supply | 380V/50Hz                             |

### Applications:

The scaffolding plank roll forming machine is a new machine that is designed for the production of scaffold planks for use in construction works. The machine is made with a Mitsubishi/Panasonic/Siemens PLC, which ensures high productivity and efficiency in the production process. The rolling thickness of the machine is 2.0-3.0mm, which makes it suitable for the production of high-quality scaffolding planks. The scaffolding plank roll forming machine is ideal for building material shops and construction works that require high-quality scaffolding plank boards. The machine is easy to operate and maintain, making it perfect for small and large-scale production. The key selling points of the machine include high productivity, efficiency, and durability.

The scaffolding plank roll forming machine is applicable in a wide range of industries, including building material shops, construction works, and steel scaffolding plank boards. The machine is designed to produce plank decking scaffold boards, which are used in the construction of scaffolding and other structures. The machine is a perfect fit for industries that require high-quality scaffolding plank board production.

### Support and Services:

The Scaffolding Making Machine is a high-tech and efficient solution designed for the production of scaffolding systems. Our technical support team is available to assist with any product issues or questions that may arise during operation. We also offer comprehensive training services to ensure that operators are properly trained to use the machine safely and effectively.

In addition, we provide maintenance and repair services to keep the machine in optimal condition and minimize downtime. Our team of experienced technicians is equipped to handle any repairs or upgrades that may be necessary.

For customers who require customized solutions, we offer design and engineering services to create tailored solutions that meet specific requirements. Our team of experts will work closely with customers to understand their needs and develop a solution that meets their unique specifications.

### Packing and Shipping:

Product Packaging:

The Scaffolding Making Machine will be securely packaged in a wooden crate to ensure it arrives at your location in excellent condition.

Shipping:

We offer worldwide shipping using reputable carriers to ensure your Scaffolding Making Machine arrives on time and in perfect condition.

Shipping fees will be calculated based on your location and added to your order total at checkout.
