

Metal Walk Platform Scaffolding Making Machine With Hydraulic Cutting

Our Product Introduction

For more products please visit us on roll-formermachines.com

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Scaffold board
- Minimum Order Quantity: 1 Set
- Price: USD25000-USD95000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Plc: Mitsubishi/ Panasonic/ Siemens
- Cutting System: Hydraulic Cutting
- Type: Tile Forming Machine, Fully Automatic
- Applicable Industries: Building Material Shops, Construction Works, Steel Scaffolding Plank Board
- Condition: New
- Key Selling Points: High Productivity
- Name: Metal Walk Platform Steel Scaffolding Plank Board Roll Forming Machine
- Power Supply: 380V/50Hz
- Highlight: Walk Platform Scaffolding Making Machine, Metal Scaffolding Making Machine

Product Description

Metal Walk Platform Steel Scaffolding Plank Board Roll Forming Machine With Hydraulic Cutting

Product Description:

Whether you operate a building material shop or a construction worksite, the Scaffold Plank Roll forming Machine is the perfect addition to your production line. Its advanced hydraulic cutting system ensures that each plank is precisely cut to the required length, while the PLC control system (available in Mitsubishi, Panasonic or Siemens) ensures that the machine operates smoothly and efficiently. Powered by a 380V/50Hz power supply, the Scaffold Plank Roll forming Machine is highly versatile and can be used to produce a wide range of scaffolding plank boards. Its compact size and user-friendly design make it easy to install and operate, even in small workshops or on construction sites.

Investing in the Scaffold Plank Roll forming Machine is a smart choice for any business that wants to increase its production capacity and reduce labor costs. By automating the production process, this machine can produce high-quality scaffolding planks at a faster rate than traditional methods, while also minimizing the risk of human error.

So why wait? Order your Scaffold Plank Roll forming Machine today and experience the benefits of this powerful and efficient machine for yourself!

Features:

Product Name: Scaffolding Making Machine

Rolling Thickness: 2.0-3.0mm

Material of Rollers: GCr15 Bearing Steel With Quench Treatment

Applicable Industries: Building Material Shops, Construction Works, Steel Scaffolding Plank Board

Key Selling Points: High Productivity

PLC: Mitsubishi/ Panasonic/ Siemens

Scaffolding Planks Roll Forming Machine

The Scaffolding Making Machine is a high productivity machine designed for rolling thicknesses of 2.0-3.0mm. It features rollers made of GCr15 Bearing Steel with quench treatment and is suitable for use in building material shops, construction works, and steel scaffolding plank board manufacturing. The machine is equipped with a PLC from Mitsubishi, Panasonic, or Siemens. It is an ideal solution for those looking for a high-speed and efficient Scaffolding Walk Board Roll Forming Machine.

Technical Parameters:

Key Selling Points	High Productivity
Work Speed	0-15m/min
Type	Tile Forming Machine, Fully Automatic
Condition	New
Material of Rollers	GCr15 Bearing Steel With Quench Treatment
Power Supply	380V/50Hz
Name	Metal Walk Platform Steel Scaffolding Plank Board Roll Forming Machine
Applicable Industries	Building Material Shops, Construction Works , Steel Scaffolding Plank Board
PLC	Mitsubishi/ Panasonic/ Siemens
Cutting System	Hydraulic Cutting

Applications:

The Scaffolding Walk Board Roll Forming Machine is equipped with a hydraulic cutting system and a PLC that can be from Mitsubishi, Panasonic, or Siemens. Its key selling point is its high productivity, making it ideal for building material shops, construction works, and steel scaffolding plankboard production. The rolling thickness of this machine is 2.0-3.0mm, making it perfect for creating sturdy scaffolding planks for construction projects.

The Scaffold Plank Roll forming Machine produced by Hangzhou Maxwell is designed for efficient and precise production of scaffolding planks. This machine is perfect for building material shops, construction works, and steel scaffolding plank board production. It is certified with CE and ISO9001, making it a high-quality product. It has a minimum order quantity of 1 set and is delivered in a 40 feet container in nude packing. The delivery time for this product is 60 workdays, and payment can be made through T/T or L/C. The supply ability for this product is 30 sets per month.

The Scaffold Plank Roll forming Machine is equipped with a hydraulic cutting system and a PLC that can be from Mitsubishi, Panasonic, or Siemens. Its key selling point is its high productivity, making it ideal for creating sturdy scaffolding planks for construction projects. The rolling thickness of this machine is 2.0-3.0mm, ensuring that the scaffolding planks produced are strong and durable.

The Scaffold Plank Roll forming Machine produced by Hangzhou Maxwell is perfect for creating scaffolding planks for various construction projects. With its high productivity and precision, it is a reliable and efficient machine that can meet the demands of building material shops, construction works, and steel scaffolding plank board production.

Support and Services:

The Scaffolding Making Machine is a complex piece of equipment that requires proper technical support and services to ensure optimal performance and longevity. Our team of experienced technicians and engineers are available to provide the following services:

- Installation and commissioning of the machine
- Operator training and machine maintenance
- Troubleshooting and repair services
- Spare parts and component replacements
- Upgrades and retrofits to improve machine functionality and efficiency

Our technical support and services are designed to minimize downtime and maximize productivity for our customers. Contact us for more information on how we can support your scaffolding making needs.

Packing and Shipping:

Product Packaging:

The scaffolding making machine will be packaged in a sturdy wooden crate to ensure safe delivery.

The machine will be securely fastened to prevent any movement during transit.

The crate will be labeled with the product name, weight, and dimensions for easy identification.

Shipping:

The scaffolding-making machine will be shipped via sea or air freight, depending on the customer's preference.

The shipping cost will be calculated based on the destination and weight of the machine.

The customer will receive a tracking number once the machine has been shipped.

Delivery times will vary depending on the shipping method and destination.
