

30KW Furring Channel Roll Forming Machine 20m/Min-75m/min For PPGI Tile

Our Product Introduction

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Keel machine
- Minimum Order Quantity: 1 Set
- Price: USD5000-USD35000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Size: 89*41mm
- Machine Speed: 20-75m/min Or As Your Request
- Material Of Shaft: NO.45 Fine Steel With Heat Treatment
;Diameter 75mm Shaft
- Main Motor Power: 30KW
- Tile Type: PPGI, PPGI, AL
- Material Of Blade: Cr12Mov With Quenching
- Applicable Industries: Decoration Ceiling
- Main Motor: Siemens
- Highlight: **30KW Furring Channel Roll Forming Machine,
Furring Channel Roll Forming Machine 20m/Min
,
Furring Channel Roll Forming Machine 75m/Min**

Product Description

30KW Furring Channel Roll Forming Machine With Siemens Motor 75mm Diameter Shaft Quenched Blade For PPGI Tile

Product Description:

With a voltage of 380V/50Hz/3Phase and a size of 89*41mm, this roll forming machine is built to handle a wide range of materials and specifications. Its main motor power of 30KW ensures efficient and consistent production, while the PLC controller and screen make it easy to operate and monitor.

Designed for use with materials such as PPGI, PPGI, and AL, this roll forming machine can be customized to meet your specific needs. With its precise and reliable performance, you can produce high-quality metal framing components that meet the most demanding standards.

Whether you're a construction professional, contractor, or manufacturer, the Stud and Track Roll Forming Machine is an essential tool for your business. With its advanced features, durable construction, and exceptional performance, this roll forming machine is the ideal choice for producing stud and track systems, furring channels, and other metal framing components.

Features:

Product Name: Stud And Track Roll Forming Machine

Also known as: Furring Channel Roll Forming Machine, Drywall Profile Roll Forming Machine

Material Stress: 235MPa

Main Motor: Siemens

Rolling Thickness: 0.4-1.2mm

Main Motor Power: 30KW

Material of Blade: Cr12Mov With Quenching

Technical Parameters:

Metal Stud Roll Forming Machine	
Controller	PLC, Screen
Applicable Industries	Decoration Ceiling
Main Motor Power	30KW
Rolling Thickness	0.4-1.2mm
Voltage	380V/50Hz/3Phase
Machine Speed	20-75m/min Or As Your Request

Material of Shaft	NO.45 Fine Steel With Heat Treatment ;Diameter 75mm Shaft
Material Stress	235MPa
Plc	Mitsubishi/delixi/siemens
Main Motor	Siemens
Steel Channel Roll Forming Machine	
Stud and Track Roll Forming Machine	

Applications:

Hangzhou Maxwell is the leading manufacturer of Track Roll Forming Line and Equipment in Zhejiang, China. Our product is designed to meet the needs of the construction industry. The Drywall Profile Roll Forming Machine is highly efficient and produces high-quality stud and track profiles. It is widely used in various construction projects and decoration ceilings.

The Stud And Track Roll Forming Machine is certified with CE and ISO9001. We ensure to provide our customers with the best quality product. The minimum order quantity is 1 set, and we offer packaging in nude packing in a 40 feet container. The delivery time for the product is 60 workdays, and the payment terms are T/T or L/C.

The supply ability of the product is 30 sets per month. The Tile Type used in the Roll Forming Machine is PPGL, PPGL, and AL. The rolling thickness of the machine ranges from 0.4mm to 1.2mm. The material of rollers used in the machine is Gcr15 Bearing Steel with Quenching.

The Stud And Track Roll Forming Machine is highly applicable in the decoration ceiling industry. It produces high-quality stud and track profiles that are used in various construction projects. The main motor used in the machine is Siemens, which ensures high efficiency and accuracy.

The product application occasions and scenarios for the Stud And Track Roll Forming Machine are vast. It is used in the construction of residential and commercial buildings, warehouses, and factories. The machine can be used to produce different types of profiles that are used in the construction of walls, partitions, and ceilings. The machine is highly efficient and produces high-quality profiles that meet the needs of the construction industry.

Support and Services:

The Stud And Track Roll Forming Machine is designed with high-quality materials and advanced technology to ensure efficient and reliable performance. Our product technical support and services include:

[Installation and commissioning support](#)

[Training and technical assistance for operators and maintenance personnel](#)

[Regular maintenance and repair services](#)

[Supply of spare parts and components](#)

[Upgrades and retrofits to improve performance and extend machine life](#)

[24/7 technical support and troubleshooting assistance](#)

Our team of experienced technicians and engineers are dedicated to providing prompt and effective support to ensure your machine operates at peak performance and productivity.

Packing and Shipping:

Product Packaging:

The Stud and Track Roll Forming Machine will be packaged in a sturdy wooden crate to ensure safe transportation. The machine will be securely fastened to prevent any damage during shipping.

Shipping:

Shipping will be arranged by our company and will be delivered to the customer's designated address. We will provide a tracking number to the customer so they can monitor the progress of their shipment.
