

Steel Stud And Track Forming Machine Cr12Mov Blade With Siemens Motor

Our Product Introduction

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Keel machine
- Minimum Order Quantity: 1 Set
- Price: USD5000-USD35000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Voltage: 380V/50Hz/3Phase
- Material Of Blade: Cr12Mov With Quenching
- Main Motor: Siemens
- Tile Type: PPGI, PPGI, AL
- Main Motor Power: 30KW
- Machine Speed: 20-75m/min Or As Your Request
- Material Of Shaft: NO.45 Fine Steel With Heat Treatment ; Diameter 75mm Shaft
- Material Stress: 235MPa
- Highlight: **Steel Stud And Track Forming Machine,
Steel Stud Forming Machine Cr12Mov Blade,
CE Stud And Track Forming Machine**

Product Description

Voltage Steel Channel Roll Forming Machine Cr12Mov Blade With Siemens Motor

Product Description:

One of the most important features of this Stud and Track Roll Forming Machine is its size. The machine measures 89*41mm, making it an ideal choice for a wide range of applications. This size makes it easy to handle and transport, while still providing the power and performance needed for high-quality production.

Another key feature of this Metal Stud Roll Forming Machine is its main motor power. With a 30KW motor, this machine is capable of producing high-quality products quickly and efficiently. This powerful motor ensures that the machine can handle even the most demanding production requirements.

The material of the shaft is NO.45 fine steel with heat treatment and a diameter of 75mm, ensuring that it is strong and durable. This material allows the machine to withstand the wear and tear of continuous use, ensuring that it can produce high-quality products for years to come.

The material of the rollers is Gcr15-bearing

steel with quenching, making them strong and durable. This material is ideal for applications that require high precision and accuracy, ensuring that the machine can produce products that meet the highest quality standards.

This Steel Channel Roll Forming Machine is capable of rolling thicknesses ranging from 0.4-1.2mm, making it an ideal choice for a wide range of applications. Whether you need to produce thin or thick products, this machine can handle the job with ease.

In conclusion, the Stud and Track Roll Forming Machine is a high-quality, reliable machine that is ideal for a wide range of industrial applications. Whether you need to produce metal studs, furring channels, or steel channels, this machine is up to the task. With its high-quality materials, powerful motor, and precision rollers, this machine is sure to meet all of your production needs.

Features:

Product Name: Stud And Track Roll Forming Machine

Material of Shaft: NO.45 Fine Steel With Heat Treatment ;Diameter 75mm Shaft

Voltage: 380V/50Hz/3Phase

Rolling Thickness: 0.4-1.2mm

Tile Type: PPGI,PPGI,AL

Plc: Mitsubishi/delixi/siemens

This Stud And Track Roll Forming Machine is ideal for manufacturing metal studs and furring channels, as well as track roll forming. It features a shaft made of NO.45 fine steel with heat treatment, with a diameter of 75mm. The machine runs on a voltage of 380V/50Hz/3Phase and can roll a thickness of 0.4-1.2mm. It is compatible with PPGI, PPGI and AL tiles. The machine is equipped with a PLC from Mitsubishi, Delixi or Siemens.

Technical Parameters:

Product Name:	Stud and Track Roll Forming Machine
---------------	-------------------------------------

Applicable Industries:	Decoration Ceiling
Controller:	PLC, Screen
Size:	89*41mm
Material of Rollers:	Gcr15 Bearing Steel With Quenching
Tile Type:	PPGI, PPGI, AL
Main Motor:	Siemens
Material of Shaft:	NO, 45 Fine Steel With Heat Treatment; Diameter 75mm Shaft
Material Stress:	235MPa
Voltage:	380V/50Hz/3Phase
Main Motor Power:	30KW

Applications:

Our Stud and Track Roll Forming Machine is certified with CE and ISO9001, ensuring top-quality production. With a minimum order quantity of 1 set, we offer nude packing in a 40-foot container and deliver in 60 workdays. Payment terms accepted are T/T and L/C, and we have a supply ability of 30 sets per month.

Our Stud and Track Roll Forming Machine is equipped with a main motor from Siemens that can produce a machine speed of 20-75m/min or as per your request. With a size of 89*41mm, this machine is perfect for various scenarios and occasions.

Applicable in the decoration ceiling industry, our Stud and Track Roll Forming Machine is versatile and efficient. Whether used in large-scale construction or small DIY projects, this machine offers excellent performance and quality.

Packing and Shipping:

Product Packaging:

The Stud and Track Roll Forming Machine will be packed in a wooden case to ensure safe delivery.

The machine will be wrapped with plastic film to prevent scratches and dust.

Shipping:

We will ship the machine via sea or air, depending on the customer's preference and location.

Shipping will be arranged as soon as possible after receipt of payment.

The customer will be provided with a tracking number to monitor the shipment.
