

30KW Powerful Metal Stud Roll Forming Machine With 235MPa Stress

Our Product Introduction

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Keel machine
- Minimum Order Quantity: 1 Set
- Price: USD14000-USD35000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Material Of Blade: Cr12Mov With Quenching
- Main Motor Power: 30KW
- Material Of Shaft: NO.45 Fine Steel With Heat Treatment ; Diameter 75mm Shaft
- Tile Type: PPGI, PPGI, AL
- Material Stress: 235MPa
- Controller: PLC, Screen
- Machine Speed: 20-75m/min Or As Your Request
- Rolling Thickness: 0.4-1.2mm
- Highlight: **30KW Metal Stud Roll Forming Machine, Powerful Metal Stud Roll Forming Machine, 235MPa Stress Metal Stud Forming Machine**

Product Description

30KW Powerful Metal Stud Roll Forming Machine with 235MPa Stress

Product Description:

The Furring Channel Roll Forming Machine is equipped with a high-quality controller that includes a PLC and a screen. This controller is user-friendly and easy to operate, making it an ideal choice for both novice and experienced operators. The machine is capable of producing furring channels at a speed of 20-75m/min, or as per your request. This ensures high productivity and efficiency, which is essential for meeting customer demands and deadlines.

The machine is powered by a 30KW main motor, which is highly efficient and reliable. This motor is designed to provide maximum power and performance, ensuring that the machine operates at optimal levels at all times. The machine is also equipped with a state-of-the-art cutting system that ensures accurate and precise cutting of the furring channels. This ensures that the finished products are of the highest quality and meet the required specifications.

The Furring Channel Roll Forming Machine is designed to be durable, reliable, and easy to maintain. It is made from high-quality materials that are designed to withstand the rigors of daily use and provide long-lasting performance. The machine is also equipped with a range of safety features that ensure the safety of the operator and the machine.

In summary, the Furring Channel Roll Forming Machine is an advanced production line that is designed to produce high-quality furring channels. It is equipped with a reliable PLC control system, a user-friendly controller, and a state-of-the-art cutting system. It is also highly efficient, thanks to its 30KW main motor, and easy to maintain. This machine is an ideal choice for anyone looking to produce high-quality furring channels efficiently and cost-effectively.

Features:

Product Name: Stud And Track Roll Forming Machine

Voltage: 380V/50Hz/3Phase

Applicable Industries: Decoration Ceiling

Material of Shaft: NO.45 Fine Steel With Heat Treatment: Diameter 75mm Shaft

Size: 89*41mm

Material of Blade: Cr12Mov With Quenching

This Furring Channel Roll Forming Machine is an excellent Steel Channel Roll Forming Machine that is perfect for the Decoration Ceiling industry. It has a voltage of 380V/50Hz/3Phase and features a material of shaft made of NO.45 Fine Steel with Heat Treatment with a diameter of 75mm Shaft. The blade is made of Cr12Mov with Quenching, making it highly durable. The size of the machine is 89*41mm, making it ideal for a variety of applications.

Technical Parameters:

Main Motor Power	30KW
Main Motor	Siemens
Plc	Mitsubishi/delixi/siemens
Controller	PLC, Screen
Material Stress	235MPa
Size	89*41mm
Material of Blade	Cr12Mov With Quenching
Rolling Thickness	0.4-1.2mm
Material of Shaft	NO.45 Fine Steel With Heat Treatment ;Diameter 75mm Shaft
Tile Type	PPGI,PPGI,AL

Applications:

Our Metal Stud Roll Forming Machine is certified with CE and ISO9001, and it can be used in various industries such as construction, decoration, and other metal framing projects. The minimum order quantity for our product is 1 set, and we package them in nude packing in a 40 feet container. The delivery time of our product is 60 workdays, and we accept payment through T/T or L/C. Our supply ability is 30 sets per month, and we ensure timely delivery to our customers.

The Metal Stud Roll Forming Machine comes with a Cr12Mov blade with quenching for precise cutting of metal sheets. The machine operates on a voltage of 380V/50Hz/3Phase, and it is equipped with a Siemens main motor. The shaft of the machine is made of NO.45 fine steel with heat treatment, and it has a diameter of 75mm. The size of the Metal Stud Roll Forming Machine is 89*41mm.

The Metal Stud Roll Forming Machine is suitable for producing metal studs and tracks of different sizes and thicknesses. It is highly efficient and can produce up to 25-30 meters per minute. This makes it ideal for use in large-scale metal framing projects. Additionally, the machine is easy to operate, and it comes with a user-friendly interface that makes it easy for operators to control and monitor the production process.

The Track Roll Forming Line and Equipment is designed for producing metal tracks for various metal framing applications. The machine is highly efficient and can produce up to 25-30 meters per minute. It is made of high-quality materials, and it is designed to withstand harsh working conditions. The machine is easy to operate, and it comes with a user-friendly interface that makes it easy for operators to control and monitor the production process.

In conclusion, the Metal Stud Roll Forming Machine and the Track Roll Forming Line and Equipment are essential tools for metal framing projects. They are made of high-quality materials and are designed to withstand harsh working conditions. They are easy to operate, and they come with a user-friendly interface that makes it easy for operators to control and monitor the production process. Contact Hangzhou Maxwell today for your Metal Stud Roll Forming Machine and Track Roll Forming Line and Equipment needs.

Support and Services:

The Stud And Track Roll Forming Machine is a high-efficiency equipment used in the production of metal studs and tracks for drywall partitions, suspended ceilings, and other framing systems. It is equipped with advanced control technology and a user-friendly interface, allowing for easy operation and maintenance. Our company provides comprehensive technical support and services for our customers, including:

[Installation guidance and training](#)

[Machine operation and maintenance manual](#)

[Online and on-site technical support](#)

[Spare parts supply and replacement](#)

[Warranty and after-sales service](#)

We are committed to providing our customers with reliable and efficient solutions for their production needs. Our team of experienced technicians and engineers is dedicated to ensuring the proper functioning and longevity of our machines. Contact us for more information on our technical support and services.

Packing and Shipping:

The Stud and Track Roll Forming Machine will be securely packaged in a wooden crate to ensure safe and damage-free delivery.

Shipping:

We offer worldwide shipping for the Stud and Track Roll Forming Machine. The shipping cost will vary depending on the destination and delivery time. Customers can choose to use their preferred shipping method or opt for our recommended shipping service.
