

Automatic Auxiliary Equipment Hydraulic Cylinder 15 Tons Hydraulic Decoiler With Loading Cart

Our Product Introduction

For more products please visit us on roll-formermachines.com

Basic Information

- Place of Origin: Zhejiang, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Decoiler
- Minimum Order Quantity: 1 Set
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 100 Set per Mon

Product Specification

- Name: 15Tons Hydraulic Decoiler With Loading Cart
- Key Selling Points: Easy To Operate
- Core Components: Motor, Pump, Other
- Machine Type: Steel/PPGI/zinc
- Usage: Uncoil
- Frequency: 50Hz
- Operate Style: Fully Automatic
- Drive: It Is Driven Vertically By Hydraulic Cylinder With Four Guide Pillars.
- Highlight: **Automatic Auxiliary Equipment, 15 Tons Hydraulic Decoiler**

Product Description

Hydraulic Cylinder 15Tons Hydraulic Decoiler With Loading Cart For Easy Vertical Operation

Product Description:

The 15 Tons Hydraulic Decoiler with Loading Cart is designed for handling heavy metal coils with efficiency and precision. This robust machine is essential for sheet metal processing lines, ensuring smooth and uninterrupted operation. The Electric Decoiler is a simple and cost-effective solution for handling materials. It features an electric motor that powers the recoiling process, making it an ideal choice for small-scale operations or those with limited space. This variant is easy to operate, allowing users to quickly and efficiently decoil materials as needed.

The Hydraulic Decoiler is a more powerful and versatile option that is suitable for medium to large-scale operations. It features a hydraulic system that provides greater control and precision in the recoiling process. This variant is also easy to operate, thanks to its intuitive controls and user-friendly design.

The Hydraulic Decoiler with Coil Car is the most advanced variant of the Auxiliary Equipment product. It features a coil car that can transport heavy materials with ease, making it an ideal choice for large-scale operations that require efficient and reliable equipment. This variant is also easy to operate, thanks to its advanced controls and intuitive interface.

In summary, the Auxiliary Equipment product is a versatile and efficient machine that can handle different types of materials. It is easy to operate, thanks to its intuitive controls and user-friendly design. The product features a digital display that provides users with accurate information about the machine's performance, while its core components ensure smooth and efficient operation. With different variants to choose from, users can select the one that best suits their needs, whether it's the Electric Decoiler, Hydraulic Decoiler, or Hydraulic Decoiler with Coil Car. Overall, the Auxiliary Equipment product is an excellent investment for businesses that require efficient and reliable equipment for their operations.

Features:

High Capacity: Capable of handling coils up to 15 tons, making it suitable for heavy-duty applications.

Hydraulic System: Equipped with a powerful hydraulic system for easy and efficient decoiling. The hydraulic expansion and contraction mechanism ensures secure and stable coil handling.

Loading Cart: The integrated loading cart facilitates easy loading and unloading of coils, enhancing operational efficiency and reducing labor intensity.

Adjustable Width: The decoiler can accommodate various coil widths, providing versatility for different production requirements.

Automatic Braking System: An automatic braking system prevents over-coiling and ensures precise control of the coil feed.

User-Friendly Controls: The machine features an intuitive control panel for easy operation and adjustments. The PLC control system allows for precise settings and automated operation.

Durable Construction: Built with high-quality materials to withstand heavy loads and continuous operation, ensuring long service life and reliability.

Technical Parameters:

Operate Style:	Fully Automatic
Drive:	It Is Driven Vertically By Hydraulic Cylinder With Four Guide Pillars.
Warranty:	1 Year
Usage:	Uncoil
Frequency:	50Hz
Feeding Width:	1250mm
Voltage:	220V
Core Components:	Motor, Pump, Other
Display:	Digital
Key Selling Points:	Easy To Operate

Applications:

The 15 Tons Hydraulic Decoiler with Loading Cart is ideal for use in various industries, including automotive, construction, and manufacturing. It is perfect for feeding metal sheets into roll forming machines, cutting lines, and stamping presses, providing a seamless and efficient workflow.

Investing in this hydraulic decoiler will enhance your production capabilities, improve efficiency, and ensure a smooth and reliable material handling process.

The Hydraulic Decoiler from Hangzhou Maxwell is an excellent investment for industries that require the use of metal coils. Its high-quality design, certifications, and warranty make it a reliable and safe option for various metalworking operations. Contact Hangzhou Maxwell today to place your order for the Hydraulic Decoiler.

Support and Services:

The Auxiliary Equipment product technical support and services include:

- Troubleshooting assistance for any issues or errors encountered during product use
- Repair and maintenance services to ensure proper functioning of the equipment
- Upgrades and updates to keep the equipment up-to-date and improve performance
- Technical documentation and user manuals to assist with installation and operation
- Training and education services to help users gain a better understanding of the product
