

Gearbox Driven Highway Guardrail Making Machine OEM With Hydraulic Cutting

Our Product Introduction

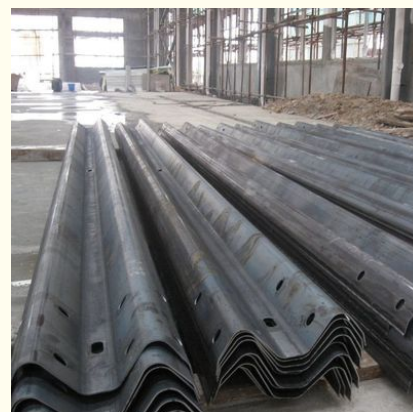

Basic Information

- Place of Origin: Jiangsu,China
- Brand Name: Hangzhou Maxwell
- Certification: CE,ISO9001
- Model Number: Highway Guardrail
- Minimum Order Quantity: 1 Set
- Price: USD25000-USD75000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T;L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Driven: Gearbox
- Forming Rollers: 45# Steel, Treat Treatment HRC58-60
- Material Of Rollers: GCr15 Bearing Steel With Quench Treatment,HRC58-62
- Usage: Highway Guardrail
- Material Thickness: 2.5-4.2mm
- Market: Export To Global
- OEM: Yes
- Cutting Type: Hydraulic Cutting
- Highlight: **Gearbox Driven Highway Guardrail Making Machine**
, Highway Guardrail Making Machine OEM,
Hydraulic Cutting Highway Guardrail Making Machine

Product Description

Gearbox Driven Highway Guardrail Roll Forming Machine With Hydraulic Cutting

Product Description:

The Highway Guardrail Roll Forming Machine is equipped with a PLC control system that allows for easy and precise control of the entire production process. With this control mode, you can adjust the machine's speed, length, and other parameters to meet your specific requirements. This makes it ideal for both small and large-scale production needs.

The machine is made of high-quality materials that ensure its durability and longevity. Its forming rollers are made of 45# steel, treated with heat treatment, and have an HRC58-60 hardness level. This ensures that the rollers have a long lifespan and can withstand the wear and tear of continuous use. The Highway Guardrail Roll Forming Machine is also equipped with a hydraulic cutting system that can cut the guardrails to the desired length accurately.

As an OEM, we can customize the Highway Guardrail Roll Forming Machine to meet your specific production needs. Whether you need a machine for a small or large-scale production line, we can design and manufacture the machine to your exact specifications. Our team of experts will work closely with you to ensure that the machine meets your specific requirements and delivers high-quality results.

In summary, the Highway Guardrail Roll Forming Machine is a top-of-the-line machine that is ideal for producing high-quality highway guardrails. Its advanced technology, durable materials, and customizable features make it a highly efficient and reliable machine for your production needs. Whether you are a small-scale manufacturer or a large-scale production facility, the Highway Guardrail Roll Forming Machine is an excellent investment that will help you meet your production goals.

Features:

Product Name: Highway Guardrail Roll Forming Machine

Usage: Highway Guardrail

Control Mode: PLC

Oem: Yes

Forming Stations: According To You Profile Drawings

Name: Highway Guardrail W beam roll forming machine

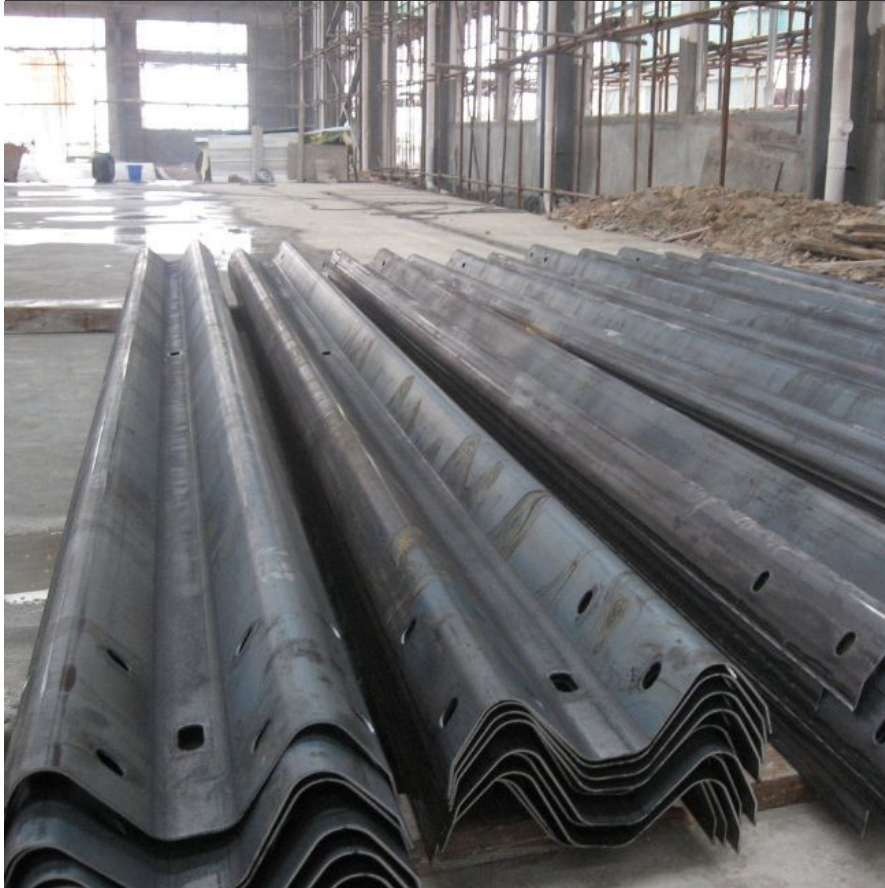

Name: Highway guardrail roll forming machine

Name: Highway Guardrail W beam roll forming machine

Technical Parameters:

Product Name:	Highway Guardrail W Beam Roll Forming Machine
Market:	Export To Global
Applicable Industries:	Building Material Shops, Manufacturing Plant, Machinery Repair Shops, Construction Works

Forming Rollers:	45# Steel, Treat Treatment HRC58-60
Control System:	PLC
Forming Stations:	According To Your Profile Drawings
Material of Rollers:	GCr15 Bearing Steel With Quench Treatment, HRC58-62
Material Thickness:	2.5-4.2mm
Warranty:	1 Year
Driven:	Gearbox
OEM:	Yes

Applications:

Hangzhou Maxwell is a leading brand in the production of highway guardrail roll forming machines that are made in Jiangsu, China. The product is certified by both CE and ISO9001, ensuring high-quality standards. The minimum order quantity is one set, and the product is delivered in a 40 feet container, securely packed and ready for use. The delivery time is 60 workdays, and the payment terms are T/T or L/C.

The Highway Guardrail Roll Forming Machine is specifically designed for the production of two waves road barrier roll forming machine, Highway guardrail roll forming machine, and Highway Guardrail W beam roll forming machine. The product is widely applicable in industries such as building material shops, manufacturing plants, machinery repair shops, and construction works.

The forming rollers are made of 45# steel and are treated with HRC58-60, which ensures durability and longevity. The cutting type is hydraulic cutting, which provides precision and accuracy, ensuring that every piece is of the same size and shape.

The Highway Guardrail Roll Forming Machine is ideal for use in the construction of highways, ensuring that safety measures are in place to prevent accidents. The product is easy to use and can produce a large quantity of guardrails in a short amount of time. This makes the product efficient and cost-effective.

With a supply ability of 30 sets per month, the Highway Guardrail Roll Forming Machine is readily available for purchase. The product comes with a one-year warranty, providing assurance that the product is free from defects and that the manufacturer is confident in their product's quality.

Support and Services:

The Highway Guardrail Roll Forming Machine is a product designed to efficiently produce highway guardrails with high precision and quality. Our technical support team is available to provide assistance throughout the installation process and to address any technical issues that may arise during operation. We offer training services to ensure operators are properly trained on the use of the machine to maximize its efficiency and lifespan. Our maintenance services include regular inspections and repairs to keep the machine functioning at peak performance. Additionally, we offer customization services to meet specific customer requirements. Contact us for further information.

Packing and Shipping:

Product Packaging:

The Highway Guardrail Roll Forming Machine will be packed in a sturdy wooden case to ensure safe transportation.

All parts and accessories will be properly secured and protected with foam material.

The package will be labeled with the product name, model number, and customer information.

Shipping:

The Highway Guardrail Roll Forming Machine will be shipped via sea or air, depending on customer preference and location.

The shipping cost will be calculated based on the destination and weight of the package.

The customer will be provided with a tracking number to monitor the shipment status.

The estimated delivery time will be communicated to the customer prior to shipping.
