⇔ Maxwell

High Speed Full Automatic C Channel Making Machine For Steel Structure Buildings

Basic Information

Place of Origin: Zhejiang,China
 Brand Name: Hangzhou Maxwell
 Certification: CE,ISO9001

Model Number: PurlinMinimum Order 1 Set

Quantity:

• Price: USD15000--USD25000

• Packaging Details: Nude Packing In a 40 Feet Container

Delivery Time: 60 workdaysPayment Terms: T/T;L/C

• Supply Ability: 30 Set per Mon

Product Specification

Power Supply: 3-Phase 380V Or Any

• Rolling Thickness: 1.5-3.0mm

Materia Of Rollers: GCr15 Bearing Steel With Quench

Treatment, HRC58-62

• Inverter: Yaskawa/Panasonic/siemens

Cutting Tool Material: Cr12MovForming Speed: 0-30m/min

• Key Selling Points: Easy To Operate

Cutter Material: Cr12Mov With Quenched

• Highlight: High Speed C Channel Making Machine,

Full Automatic C Channel Making Machine, ISO9001 C Channel Making Machine

Product Description

High Speed Full Automatic C Channel Making Machine Purlin Roll Forming Machine For Steel Structure Buildings

Product Description:

Full Automatic C Channel Roll Machine is a roller-driven type, which can be operated using either a gearbox or double chain transmission. This feature ensures that the machine operates smoothly and is capable of producing purlins with a thickness of 1.5-3.0mm. The gearbox or double chain transmission enhances the accuracy of the machine, making it capable of producing purlins with ±2mm cutting tolerance.

The Purlin Roll Former is equipped with a cutting tool made of Cr12Mov material, which is a high-quality tool steel known for its durability and toughness. The cutting tool ensures that the purlins produced are of high quality, with a smooth finish and precise dimensions. This machine is easy to operate and requires minimal maintenance, making it ideal for both small and large-scale manufacturing facilities. It is designed to be energy-efficient, helping manufacturers save on energy costs while producing high-quality purlins.

Overall, if you are looking for a reliable and efficient machine for producing C Z Purlin 100-300mm profiles, the Purlin Roll Forming Machine is the perfect solution. Its advanced features and high-quality components make it the ideal choice for manufacturers who demand the best.

Features:

Product Name: Purlin Roll Forming Machine

Applicable Industries: Building Material Shops, Machinery Repair Shops, Manufacturing Plant, Construction Works

Forming Speed: 0-30m/min

Material of Rollers: GCr15 Bearing Steel With Quench Treatment, HRC58-62

Inverter: Yaskawa/Panasonic

Roller Stations: 16 stands And 7 Levelling Rolls

Keywords: Purlin Roll Former, Metal Purlin Roll Forming Machine

Technical Parameters:

Power Supply	3-Phase 380V Or Any
Forming Speed	0-30m/min
Forming Profile	C U Purlin 100-300mm

Cutting Tool Material	Cr12Mov
Rolling Thickness	1.5-3.0mm
Applicable Industries	Building Material Shops, Machinery Repair Shops, Manufacturing Plant, Construction Works
Roller Stations	16stands And 7 Levelling Rolls
Cutting Tolerance	±2mm
Key Selling Points	Easy To Operate
Material of Rollers	GCr15 Bearing Steel With Quench Treatment, HRC58-62

Applications:

The Purlin Roll Machine is an excellent choice for businesses that require a machine capable of producing high-quality products. The machine is easy to operate and requires minimal maintenance, making it a cost-effective solution for businesses of all sizes. The machine is capable of producing purlin rolls with a rolling thickness of 1.5-3.0mm at a forming speed of 0-30m/min.

The machine is made from high-quality materials, including GCr15 bearing steel with quench treatment, HRC58-62. The cutting tool material is Cr12Mov, which is known for its durability and strength. The machine is designed for easy operation, with a user-friendly interface that allows operators to quickly and easily produce high-quality purlin rolls.

The Purlin Roll Forming Machine is ideal for a wide range of applications and scenarios. It is perfect for businesses that specialize in the production of purlin rolls for use in construction projects. The machine is also suitable for businesses that require a reliable and efficient machine for the production of other types of metal products.

The Hangzhou Maxwell Purlin Roll Forming Machine is supplied in nude packing in a 40-foot container. The delivery time is 60 workdays, and payment terms are T/T or L/C. The supply ability is 30 sets per month, making it a great choice for businesses that require a reliable and efficient machine for the production of purlin rolls.

In conclusion, the Hangzhou Maxwell Purlin Roll Forming Machine is an excellent choice for businesses that require a reliable and efficient machine for the production of Purlin rolls. It is a durable and reliable machine that is easy to operate and requires minimal maintenance. The machine is supplied with all necessary certifications and is manufactured to the highest standards, making it a great investment for businesses of all sizes.

Support and Services:

The Purlin Roll Forming Machine is a high-quality product that requires minimal technical support and services. However, our team of experts is always available to assist with any issues you may encounter. Our technical support includes:

Remote troubleshooting and diagnostics

On-site repairs and maintenance

Training for operators and maintenance personnel

Customization and upgrades

Our goal is to ensure that your Purlin Roll Forming Machine operates at peak performance and efficiency, maximizing your productivity and profitability. Contact us for more information on our technical support and services.

Packing and Shipping:

Product Packaging:

The Purlin Roll Forming Machine will be packaged in a sturdy wooden crate to ensure maximum protection during transportation. The machine will be securely fastened and padded to prevent any damage from vibration or impact. The crate will also be labeled with all necessary shipping information, including the product name, weight, and dimensions.

The Purlin Roll Forming Machine will be shipped via a reputable freight carrier, such as DHL, FedEx, or UPS. The shipping cost will be calculated based on the weight and destination of the shipment. The estimated delivery time will be provided to the customer once the shipment has been dispatched. The customer will also receive a tracking number to monitor the shipment's progress and ensure timely delivery.
