Q235Mpa Cable Tray Roll Forming Machine With Siemens PLC System And Cr12Mov Cutter

Basic Information

Place of Origin: Zhejiang,China
Brand Name: Hangzhou Maxwell
Certification: CE, ISO9001
Model Number: Cable Tray
Minimum Order 1 Set

Quantity:

• Price:

USD24000-USD55000

Packaging Details: Nude Packing In a 40 Feet Container

Delivery Time: 60 workdaysPayment Terms: T/T;L/C

• Supply Ability: 30 Set per Mon

Product Specification

Forming Stations: 22 StationsYield Strength: Q235Mpa

Hydraulic Station Power:15KW

Controller: PLC System
Plc: Siemens
Cutter Standard: Cr12Mov
Raw Material: PPGI,PPGI
Material Width: 100-600mm

• Highlight: Q235Mpa Cable Tray Roll Forming Machine,

ISO9001 Cable Tray Roll Forming Machine

Yield Strength Cable Tray Roll Forming Machine With Siemens PLC System And Cr12Mov Cutter

Product Description:

One of the standout features of this Cable Tray Machine is its powerful hydraulic motor, which has a power output of 3kW. This means that it is capable of producing cable trays quickly and efficiently, making it an ideal choice for manufacturers who need to produce large quantities of trays in a short amount of time.

In addition to its power and versatility, the Cable Tray Support Channel Roll Forming Machine is also built to last. It is constructed from high-quality materials that are designed to withstand the rigors of continuous use, ensuring that it will provide a long service life. The Cutter Standard for this Cable Tray Machine is Cr12Mov, which is a high-quality material that is known for its durability and resistance to wear and tear. This means that the machine can produce high-quality cable trays with clean, precise cuts, ensuring that each tray is of the highest quality.

Overall, the Cable Tray Support Channel Roll Forming Machine is an excellent choice for manufacturers who need to produce high-quality cable trays quickly and efficiently. Its powerful hydraulic motor, durable construction, and high-quality Cutter Standard make it a reliable and long-lasting piece of equipment that will provide excellent value for money over the long term.

Features:

Product Name: Cable Tray Roll Forming Machine

Core Components: Motor, Pump, PLC

Capacity: About 0-15m/min

Control: PLC Systems

Key Selling Points: Long Service Life

PLC: Siemens

Cable Tray Machine Manufacturer

Technical Parameters:

Cable Tray Machine Manufacturer:	Not specified
Product Name:	Cable Tray Roll Forming Machine
Cable Tray Channel Roll Forming Machine:	Yes
Material Width:	100-600mm
Material Thickness:	1.0-2.0mm Galvanized Coils
Cutter Standard:	Cr12Mov

Core Components:	Motor, Pump, PLC
Control:	PLC Systems
Controller:	PLC System (Siemens)
Hydraulic Station Power:	15KW
Forming Stations:	22 Stations
Yield Strength:	Q235Mpa

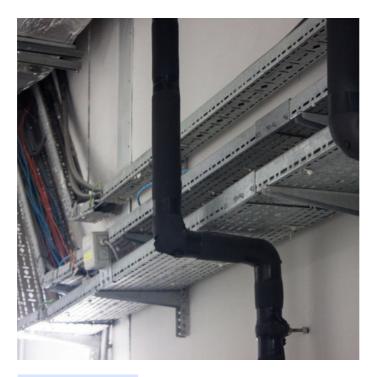

Applications:

Our Cable Tray Roll Forming Machine is designed to roll form cable trays quickly and efficiently. It is suitable for use in a variety of applications, including power distribution, telecommunications, and automation. Its Cutter Standard, Cr12Mov, ensures that the product is durable and long-lasting, while its Yield Strength of Q235Mpa ensures that it can handle the toughest of jobs.

The Cable Tray Roll Forming Machine is equipped with a PLC System that controls the entire process, making it easy to operate and monitor. The Hydraulic Station Power of 15KW ensures that the machine can operate at high speeds, producing up to 15m/min. It is capable of producing different sizes of cable trays, making it a versatile product for different needs.

Our Cable Tray Roll Forming Machine is available for a minimum order quantity of 1 set and is delivered in a 40-feet container in Nude Packing. The delivery time is 60 workdays, and we accept T/T and L/C as payment terms. Our supply ability is 30 sets per month, ensuring that we can meet the demands of our customers.

The Cable Tray Roll Forming Machine is an essential tool for cable tray channel roll forming. It is suitable for use in various scenarios, including construction sites, factories, and warehouses. Its versatility and efficiency make it an ideal product for cable tray channel roll forming, and it is a valuable investment for any business looking to improve its operations.

Customization:

The Cable Tray Channel Roll Forming Machine is CE and ISO9001 certified, ensuring that you get a high-quality product. The minimum order quantity for the Cable Tray Channel Roll Forming Machine is 1 set, and we package it in nude packing in a 40 feet container. Our delivery time is 60 workdays, and we accept T/T and L/C payment terms. We have a supply ability of 30 sets per month. The Cable Tray Channel Roll Forming Machine has a material width of 100-600mm, and the cutter standard is Cr12Mov. The PLC we use is Siemens, and it comes with 22 forming stations. Our key selling point is the long service life of our machines.

Support and Services:

Our Cable Tray Roll Forming Machine is designed to provide efficient and reliable performance for the production of cable trays. Our technical support team is available to assist with any questions or issues that may arise during the setup and operation of the machine. We offer a range of services to ensure the ongoing maintenance and optimization of your Cable Tray Roll Forming Machine. These services include regular maintenance, repairs, and upgrades to keep your machine running smoothly and efficiently. Our team of experts can provide training and assistance to your staff to ensure they are fully trained in the operation and maintenance of the machine. We also offer customized solutions to meet the specific needs of your production line. With our comprehensive technical support and services, you can be confident in the performance and longevity of your Cable Tray Roll Forming Machine.

Packing and Shipping:

The Cable Tray Roll Forming Machine will be securely packaged in a wooden crate to ensure safe transport. The machine will be wrapped in protective materials and cushioned to prevent any damage during shipping. Shipping:

The Cable Tray Roll Forming Machine will be shipped via sea or air freight, depending on the customer's preference. Shipping fees will be calculated based on the destination and weight of the machine. We will provide the customer with the estimated delivery time and tracking information once the machine has been shipped.
