

## Automatic Round / Square Tube Welding Machine Cold Saw Cutting

### Our Product Introduction

#### Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Welded Tube Mill
- Minimum Order Quantity: 1 Set
- Price: USD100,000--USD250,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 10 Set per Mon

#### Product Specification

- Roller Material: Cr12MoV
- Tube Length: 4-12 Meters
- Control System: PLC Control
- Material Type: Carbon Steel, Stainless Steel, Alloy Steel
- Wall Thickness Range: 0.4mm-2.5mm
- Cutting Method: Cold Saw Cutting
- Production Speed: 20-50m/min
- Welding Method: High Frequency Welding
- Highlight: **Round Automatic Tube Welding Machine,  
Square Automatic Tube Welding Machine,  
Automatic Welded Tube Machine**

## Product Description

### Frequency Welding Carbon Steel Tube Mill Line Automatic Stainless Steel Round/Square Tube Welded Roll Forming Machine

#### Product Description:

Our Tube Welding Machine is designed to meet the highest standards of quality and performance, providing you with a reliable and cost-effective solution for all your pipe welding needs. With its advanced features and state-of-the-art technology, our Welded Tube Mill Line is the perfect choice for any industrial or commercial application.

One of the key features of our Pipe Welding Line is its powerful 380V/50Hz/3Phase power supply, which is capable of delivering the power and performance you need to get the job done quickly and efficiently. Whether you're working with large or small diameter pipes, our Welded Tube Mill Line is up to the task.

In addition, our Tube Welding Machine features a PLC control system that allows you to easily monitor and control all aspects of the welding process, ensuring that you get the best possible results every time. This advanced control system also makes it easy to set up and program the machine, so you can start welding right away.

Another key feature of our Pipe Welding Line is its high frequency welding method, which provides a strong and reliable weld that is capable of withstanding even the toughest industrial applications. With its precise control and advanced technology, our Welded Tube Mill Line is the perfect choice for welding pipes of all sizes and materials.

Our Tube Welding Machine is also designed to handle coils weighing between 3 and 20 tons, making it easy to work with large volumes of material without having to stop and reload. And with a tube diameter range of 10mm-45mm, our Pipe Welding Line is versatile enough to handle a wide range of applications.

So if you're looking for a high-quality, reliable, and efficient Pipe Welding Line, look no further than our Welded Tube Mill Line. With its advanced features and state-of-the-art technology, our Tube Welding Machine is the perfect choice for all your pipe welding needs.

#### Features:

Product Name: Welded Tube Mill Line

Tube Length: 4-12 Meters

Welding Method: High Frequency Welding

Power Supply: 380V/50Hz/3Phase

Forming Method: Roll Forming

Wall Thickness Range: 0.4mm-2.5mm

This product is a Straight Seam Tube Milling Machine also known as a Pipe Welding Line. It's ideal for producing tubes with a length of 4-12 meters using the high frequency welding method. The power supply required for this product is 380V/50Hz/3Phase. The forming method used is Roll Forming. This product can produce tubes with a wall thickness range of 0.4mm-2.5mm.

**Technical Parameters:**

Control System	PLC Control
Forming Method	Roll Forming
Production Speed	20-50m/min
Strip Width	300mm-1600mm
Material Type	Carbon Steel, Stainless Steel, Alloy Steel
Coil Weight	3-20 Tons
Welding Seam Detection	Laser Seam Tracking System
Tube Length	4-12 Meters
Welding Method	High Frequency Welding
Power Supply	380V/50Hz/3Phase

### Applications:

Our welded tube mill line is a versatile and reliable solution for producing high-quality tubes from a variety of materials, including carbon steel, stainless steel, and alloy steel. With a minimum order quantity of just one set, our machines are suitable for businesses of all sizes. All of our products are certified to meet international quality standards, including CE and ISO9001. We pride ourselves on our commitment to quality, and we use only the highest-quality materials and components in our machines.

Our welded tube mill line comes with a range of features to ensure reliable and efficient performance. These include a laser seam tracking system for precision welding, PLC control for easy operation, and a production speed of 20-50m/min. Our machines are also capable of handling coil weights of 3-20 tons, making them ideal for high-volume production.

In terms of packaging and delivery, our welded tube mill line is shipped in a 40-foot container in nude packing. Delivery time is typically 60 workdays, and we accept payment via T/T or L/C. With a supply ability of 30 sets per month, we are well-equipped to meet the needs of businesses around the world.

Our welded tube mill line is suitable for a wide range of applications, including manufacturing pipes for the construction industry, automotive parts, and more. Whether you are a small business or a large manufacturer, our machines are a reliable and efficient solution for your tube production needs.

### Support and Services:

Our Welded Tube Mill Line product comes with comprehensive technical support and services to ensure optimal performance and minimal downtime. Our team of experienced technicians and engineers is available to provide on-site installation and commissioning, as well as operator training and maintenance services. We also offer remote technical support and troubleshooting to address any issues that may arise. In addition, we provide spare parts and upgrades to keep your equipment running at peak efficiency. Our commitment to customer satisfaction means that we are always available to answer your questions and provide the support you need to keep your Welded Tube Mill Line operating smoothly.

### Packing and Shipping:

#### Product Packaging:

The Welded Tube Mill Line product will be carefully packed in strong wooden cases for safe and secure transportation. All necessary measures will be taken to ensure that the product reaches its destination in excellent condition.

#### Shipping:

The Welded Tube Mill Line product will be shipped via sea or air, depending on the customer's preference and the urgency of the order. Shipping costs will be calculated based on the destination and the weight of the package. We will work with our trusted shipping partners to ensure timely and efficient delivery of the product.
