

20-50m/min Welded Tube Mill Line High Speed Roll Forming Machine For Small Diameter Tubes

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Welded Tube Mill
- Minimum Order Quantity: 1 Set
- Price: USD90,000--USD200,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Forming Method: Roll Forming
- Wall Thickness Range: 0.4mm-2.5mm
- Roller Material: Cr12MoV
- Welding Seam Detection: Laser Seam Tracking System
- Welding Method: High Frequency Welding
- Production Speed: 20-50m/min
- Tube Diameter Range: 10mm-45mm
- Control System: PLC Control
- Highlight: 50m/min Welded Tube Mill Line, Welded Tube Mill Line High Speed, 50m/min High Speed Roll Forming Machine

Product Description

Product Description:

Equipped with a Laser Seam Tracking System, our Welded Tube Mill Line ensures accurate and consistent welding seam detection, resulting in a seamless finish and improved product quality. The system enables the machine to adjust its position automatically, making it suitable for use with a wide range of materials, including carbon steel, stainless steel, and alloy steel.

Our Welded Tube Mill Line uses a power supply of 380V/50Hz/3Phase, making it compatible with most power sources and allowing for optimal performance. The machine is designed with ease of use and maintenance in mind, with a user-friendly interface and simple controls that make it easy to operate and adjust.

Whether you are looking to produce tubes for the automotive, construction, or other industries, our Welded Tube Mill Line is the perfect solution. It is built to meet the highest standards of quality and performance, ensuring that your products are of the highest quality and reliability.

Features:

Product Name: Welded Tube Mill Line

Material Type: Carbon Steel, Stainless Steel, Alloy Steel

Tube Diameter Range: 10mm-45mm

Coil Weight: 3-20 Tons

Cutting Method: Cold Saw Cutting

Tube Length: 4-12 Meters

Steel Tube Welding Mill, Steel Tube Welding Mill, High Frequency Welded Tube Line

Technical Parameters:

Welding Method	High Frequency Welding
Roller Material	Cr12MoV
Tube Length	4-12 Meters
Control System	PLC Control
Power Supply	380V/50Hz/3Phase
Material Type	Carbon Steel, Stainless Steel, Alloy Steel
Forming Method	Roll Forming
Coil Weight	3-20 Tons
Strip Width	300mm-1600mm
Wall Thickness Range	0.4mm-2.5mm

This is a technical parameter table for a Straight Seam Tube Milling Machine, also known as a Pipe Welding Line or Tube Welding Machine.

Applications:

The Hangzhou Maxwell Welded Tube Mill Line is designed to produce tubes with a wall thickness range of 0.4mm-2.5mm, tube lengths of 4-12 meters, and tube diameters ranging from 10mm-45mm. This Tube Welding Machine is ideal for producing tubes for a wide range of applications, including furniture, construction, and automotive industries.

The Hangzhou Maxwell Welded Tube Mill Line is also equipped with a Cold Saw Cutting method, which ensures precise and fast cutting of the tubes. This makes it easy to produce tubes of different lengths, which is essential when manufacturing products of different sizes.

The Hangzhou Maxwell Welded Tube Mill Line has a strip width range of 300mm-1600mm, making it suitable for a wide range of applications. Its high speed and accuracy make it ideal for use in large-scale production environments, while its user-friendly design ensures ease of use and efficiency.

With a minimum order quantity of just one set, the Hangzhou Maxwell Welded Tube Mill Line is an affordable and reliable solution for your tube manufacturing needs. It comes packaged in Nude Packing and can be easily loaded into a 40 Feet Container for shipping. Delivery time for this product is 60 workdays, and payment terms include T/T and L/C, making it easy to purchase.

In terms of supply and demand, the Hangzhou Maxwell Welded Tube Mill Line has a supply ability of 30 sets per month, allowing for high-volume production when needed. Its reliability and efficiency make it an excellent investment for any business looking to produce high-quality tubes quickly and efficiently.

Support and Services:

Our Welded Tube Mill Line product comes with comprehensive technical support and services to ensure maximum efficiency and minimal downtime. Our experienced technicians and engineers are available to provide on-site installation, commissioning, and training services to ensure that our customers can operate the equipment safely and effectively. In addition, we offer ongoing technical support and maintenance services to ensure that the equipment is operating at optimal performance levels. Our team of experts is available 24/7 to provide remote troubleshooting and support to minimize any potential issues. We also offer spare parts and upgrade services to ensure that the equipment is always up-to-date and running smoothly. Our spare parts inventory is constantly monitored and updated to ensure that we have the necessary parts readily available for our customers. At our company, we are committed to providing our customers with the highest level of technical support and services to ensure that they are satisfied with our products and their performance.

Packing and Shipping:

Product Packaging:

All parts of the Welded Tube Mill Line are securely packed in wooden cases to prevent damage during transportation.

The cases are labeled with the product name, size, and quantity for easy identification.

Shipping:

The Welded Tube Mill Line is shipped via sea or air transport, depending on the customer's preference and urgency.

We work with reliable shipping companies to ensure timely and safe delivery of the product to the customer's designated location.
