

Precision 10-45mm Welded Tube Mill Line With Laser Seam Tracking System

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Welded Tube Mill
- Minimum Order Quantity: 1 Set
- Price: USD90,000-USD200,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 10 Set per Mon

Product Specification

- Production Speed: 20-50m/min
- Roller Material: Cr12MoV
- Wall Thickness Range: 0.4mm-2.5mm
- Tube Diameter Range: 10mm-45mm
- Coil Weight: 3-20 Tons
- Welding Seam Detection: Laser Seam Tracking System
- Control System: PLC Control
- Power Supply: 380V/50Hz/3Phase
- Highlight: Precision Welded Tube Mill Line,
45mm Welded Tube Mill Line

Product Description

Precision 10-45mm Welded Tube Mill Line With Laser Seam Tracking System

Product Description:

The Steel Tube Welding Mill is equipped with a 380V/50Hz/3Phase power supply, ensuring reliable and consistent performance. The machine is designed to operate seamlessly, with minimal downtime and maintenance. The Pipe Welding Line is also easy to operate, making it a great option for both experienced operators and those new to tube production.

Whether you're producing tubes for construction, automotive, or other industries, the Steel Tube Welding Mill is an excellent choice. With its high-quality production capabilities, efficient operation, and reliable performance, this machine is sure to meet your tube production needs.

Features:

Product Name: Welded Tube Mill Line

Tube Diameter Range: 10mm-45mm

Wall Thickness Range: 0.4mm-2.5mm

Coil Weight: 3-20 Tons

Welding Method: High Frequency Welding

Material Type: Carbon Steel, Stainless Steel, Alloy Steel

Features:

Straight Seam Tube Milling Machine

Pipe Welding Line

High precision and efficiency

Advanced technology and design

Easy to operate and maintain

Flexible production capacity

Robust construction and durability

Technical Parameters:

Straight Seam Tube Milling Machine:	Pipe Welding Line
-------------------------------------	-------------------

Production Speed:	20-50m/min
Forming Method:	Roll Forming
Cutting Method:	Cold Saw Cutting
Control System:	PLC Control
Welding Seam Detection:	Laser Seam Tracking System
Tube Length:	4-12 Meters
Tube Diameter Range:	10mm-45mm
Wall Thickness Range:	0.4mm-2.5mm
Power Supply:	380V/50Hz/3Phase
Material Type:	Carbon Steel, Stainless Steel, Alloy Steel

Applications:

Our Straight Seam Tube Milling Machines are ideal for a wide range of product application occasions and scenarios. They are commonly used in the manufacturing of tubes, pipes, and other cylindrical structures. Our machines are suitable for different industries, such as construction, automotive, furniture, and many more.

Our Straight Seam Tube Milling Machines are perfect for producing high-quality tubes with precise dimensions. These machines are designed to ensure seamless and efficient production, and they operate at a speed of 20-50m/min. The machines use a high-frequency welding method, and they are equipped with a PLC Control System to monitor and control the production process.

The Laser Seam Tracking System is another unique feature of our Straight Seam Tube Milling Machines, which ensures precise welding seam detection. Our machines are built to last and are made of high-quality materials, including Cr12MoV roller material. They are designed for easy maintenance and are easy to operate.

At Hangzhou Maxwell, we offer our customers flexible payment terms, including T/T and L/C. Our products come with a minimum order quantity of 1 set and are packaged in a 40 feet container. We have a supply ability of 30 sets per month and offer a delivery time of 60 workdays.

Support and Services:

1. Installation and commissioning services to ensure proper setup of the equipment.
2. On-site training for operators and maintenance personnel to ensure safe and efficient operation of the equipment.
3. Technical support and troubleshooting assistance to address any issues that may arise during operation.
4. Regular maintenance and servicing to ensure optimal performance and longevity of the equipment.
5. Upgrades and retrofits to keep the equipment up-to-date with the latest technology and industry standards.

Packing and Shipping:

Product Packaging:

The Welded Tube Mill Line will be packed in wooden cases or pallets to ensure its safe transportation and delivery to the customer. The

packaging will be strong and sturdy enough to protect the machine from any damage during transit.

Shipping:

We offer shipping services to our customers worldwide. The delivery time may vary depending on the destination and mode of transportation. We will ensure that the Welded Tube Mill Line is delivered to the customer's location on time and in the best possible condition.
