

Gutter Downspout Pipe Gutter Elbow Roll Forming Machine With Fine Steel Rollers

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Gutter Downspout
- Minimum Order Quantity: 1 Set
- Price: USD27000-USD30000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 30 Set per Mon

Product Specification

- Applicable Industries: Building Material Shops, Manufacturing Plant, Construction Works, Other
- Thickness: 0.4-0.8mm
- After-Sales Service: Engineers Available To Service Machinery Overseas
- Roller Material: NO.45 Fine Steel With Quench Treatment, HRC58-62
- Forming Stations: 19stands
- Material: Galvanized Steel Coils
- Control System: PLC
- Shaft Material: NO.45 Fine Steel
- Highlight: **ISO9001 Elbow Roll Forming Machine, Gutter Elbow Roll Forming Machine**

Product Description

Galvanized Steel Gutter Downspout Pipe Gutter Elbow Roll Forming Machine With Fine Steel Rollers

Product Description:

The machine has 19 forming stations, making it a reliable and efficient machine for creating square metal downspouts, round downspouts, and metal rain gutters. Its design allows it to produce these products with precision and speed, which is perfect for large projects that require a high volume of these products.

The NO.45 Fine Steel used for the shaft material is known for its toughness and strength. This material is perfect for heavy-duty operations, making it an ideal choice for this roll forming machine. The rollers also use NO.45 Fine Steel, ensuring that they are strong and can withstand the pressure of the forming process.

One of the best things about this machine is that it can be customized in color to match the user's preferences. This feature is perfect for those who want to maintain a consistent look in their products or want to match the colors of their brand. The customization of the machine's color can also help in branding and marketing efforts.

The Square Metal Downspout Roll Forming Machine, Round Downspout Roll Forming Machine, Metal Rain Gutter Roll Forming Machine is a versatile and reliable machine that can help users meet their production needs. Its design and features ensure that it can produce high-quality products that meet industry standards. Its durability and longevity make it an excellent investment for those in the construction, manufacturing, and building material industries.

Features:

Product Name: Gutter Downspout Roll Forming Machine

Forming Stations: 19 stands

Roller Material: NO.45 Fine Steel With Quench Treatment, HRC58-62

Main Motor Power: 7.5KW

Speed: 15m/min

Material: Galvanized Steel Coils

This Round gutter downspout roll forming machine is perfect for creating downspout and elbow roll forming. It has 19 stands for forming and uses NO.45 Fine Steel with Quench Treatment rollers with HRC58-62 for durability. The main motor has a power of 7.5KW and the machine can go up to 15m/min. It's made to work with galvanized steel coils.

Technical Parameters:

Product	
Details	Parameter

Raw material	PPGI, PPGL, GI, GL
Material thickness	0.5-0.8 mm
Cutting length	Adjustable

Applications:

The Half Round Gutter Roll Forming Machine is ideal for shaping half-round gutters that are commonly used in residential and commercial buildings. The machine can produce gutters with a thickness of 0.4-0.8mm, and the shaft material is made of NO.45 Fine Steel, which ensures the machine's durability. The main motor power is 7.5KW, and the control system is PLC, making the operation of the machine easy and efficient. The product is certified by CE and ISO9001, ensuring its quality and safety.

The Square Metal Downspout Roll Forming Machine is another popular product that Hangzhou Maxwell offers, which produces square downspouts that are used in commercial and industrial buildings. The machine is designed to form downspouts with a thickness of 0.4-0.8mm, ensuring the strength and durability of the product. The machine is certified by CE and ISO9001, ensuring its quality and safety.

The Metal Rain Gutter Roll Forming Machine is designed to produce gutters with a thickness of 0.4-0.8mm, which are used in residential and commercial buildings. The machine is equipped with a PLC control system, making the operation of the machine easy and efficient. The machine is certified by CE and ISO9001, ensuring its quality and safety.

The minimum order quantity for the Gutter Downspout Roll Forming Machine is one set, and the packaging details are nude packing in a 40 feet container. The delivery time is 60 workdays, and the payment terms are T/T and L/C. The supply ability is 30 sets per month. After-sales service is provided, and engineers are available to service machinery overseas.

Support and Services:

Our product technical support team is available to assist you with any technical issues you may encounter with your machine. We offer comprehensive technical documentation, training, and troubleshooting services to help you optimize your production process and minimize downtime.

In addition, we provide a range of services to ensure that your machine is always operating at peak performance. These services include regular maintenance, repair, and parts replacement. Our experienced technicians are trained to identify and address issues quickly and efficiently, minimizing the impact on your production schedule.

With our commitment to quality and customer satisfaction, you can trust us to provide the support and services you need to keep your Gutter Downspout Roll Forming Machine running smoothly and efficiently.

Packing and Shipping:

Product Packaging:

The gutter downspout roll forming machine will be securely packaged in a wooden crate to prevent any damage during transportation.

All necessary parts and accessories will be included in the package.

The package will be labeled with the product name and any special handling instructions.

Shipping:

The gutter downspout roll forming machine will be shipped via a reliable freight carrier.

The shipping cost will be calculated based on the destination and weight of the package.

The estimated shipping time will be provided to the customer upon order confirmation.

The customer will be notified of the shipping details and provided with a tracking number once the product has been shipped.
