

## Cold Saw Cutting Welded Tube Mill Production Line 20m/min-50m/min

### Basic Information

- Place of Origin: Jiangsu,China
- Brand Name: Hangzhou Maxwell
- Certification: CE,ISO9001
- Model Number: Welded Tube Mill
- Minimum Order Quantity: 1 Set
- Price: USD100,000--USD300,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T;L/C
- Supply Ability: 10 Set per Mon

### Product Specification

- Strip Width: 300mm-1600mm
- Wall Thickness Range: 1.0mm-3.5mm
- Tube Diameter Range: 20mm-90mm
- Square Tube Range: 70\*70mm-10\*10mm
- Tube Length: As Your Require
- Welding Seam Detection: Laser Seam Tracking System
- Cutting Method: Cold Saw Cutting
- Production Speed: 20-50m/min
- Name: Welded Tube Mill Production Line
- Highlight: **Cold Saw Cutting Welded Tube Mill Production Line**  
**, Welded Tube Mill Production Line 20m/Min**

## Product Description

### Cold Saw Cutting Tube Mill Line For 20-90mm Tubes Laser Seam Tracking System 1.0-3.5mm

#### Product Description:

The Welding Seam Detection system used in the mill is a Laser Seam Tracking System. This system is used to detect any imperfections in the welding seam and ensure that the final product meets the required standards. The Laser Seam Tracking System is highly accurate and reliable, making it an essential component of the mill.

The Steel Tube Welding Mill is capable of producing tubes from various materials such as Carbon Steel, Stainless Steel, and Alloy Steel. This makes it a versatile tool in the production of tubes for various applications. The mill is also capable of producing tubes at a Production Speed of 20-50m/min, making it an efficient tool for high-volume production.

The Strip Width of the mill ranges from 300 mm to 1600 mm. This allows for the production of tubes of various shapes and sizes, making it ideal for a wide range of applications. The Steel Tube Welding Mill is easy to operate and maintain, making it a valuable asset to any production facility.

In summary, the Steel Tube Welding Mill is a High-Frequency Welded Tube Line that is used to produce tubes of various shapes and sizes. It is equipped with state-of-the-art technology such as the Laser Seam Tracking System and Roller Material of Cr12MoV to ensure high-quality production. The mill is capable of producing tubes from various materials such as Carbon Steel, Stainless Steel, and Alloy Steel, at a Production Speed of 20-50m/min. The Strip Width of the mill ranges from 300 mm to 1600 mm, making it ideal for a wide range of applications. The Steel Tube Welding Mill is a valuable asset to any production facility due to its efficiency, versatility, and ease of operation and maintenance.

#### Features:

Product Name: Welded Tube Mill Line

Welding Method: High-Frequency Welding

Wall Thickness Range: 1.0mm-3.5mm

Strip Width: 300mm-1600mm

Tube Length: As you require

Forming Method: Roll Forming

This product is also known as a Steel Tube Welding Mill, Pipe Welding Line, or Steel Tube Welding Mill.

#### Technical Parameters:

Product	High Frequency Welded Tube Line
---------	---------------------------------

Tube Diameter Range	20mm-90mm
Square Tube Range	70*70mm-10*10mm
Wall Thickness Range	1.0mm-3.5mm
Material Type	Carbon Steel, Stainless Steel, Alloy Steel
Strip Width	300mm-1600mm
Production Speed	20-50m/min
Forming Method	Roll Forming
Cutting Method	Cold Saw Cutting
Welding Seam Detection	Laser Seam Tracking System
Power Supply	380V/50Hz/3Phase
Tube Welding Machine	High Frequency Welded Tube Line

### Support and Services:

The Welded Tube Mill Line product technical support and services include:

Installation, commissioning, and training services

24/7 technical assistance and troubleshooting

Regular maintenance and inspection services

Upgrade and retrofit solutions for existing equipment

Spare parts and consumables supply

Our team of experienced engineers and technicians is dedicated to providing top-quality support and services to ensure the optimal performance and longevity of your Welded Tube Mill Line.

### Packing and Shipping:

The welded tube mill line will be securely packaged in wooden crates to prevent any damage during transit.

All components and parts will be properly labeled for easy identification and assembly.

Clear instructions will be included for the assembly and installation of the tube mill line.

Shipping:

The welded tube mill line will be shipped via a reputable shipping company to ensure safe and timely delivery.

The shipping cost will be included in the overall cost of the product.

The customer will be provided with a tracking number to monitor the status of their shipment.

Shipping times may vary depending on the customer's location and any potential customs delays.
