

Durable Welded Tube Mill Line 380V 50Hz 3Phase for Square Tube 70*70mm-10*10mm

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Welded Tube Mill
- Minimum Order Quantity: 1 Set
- Price: USD150,000--USD450,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 10 Set per Mon

Product Specification

- Wall Thickness Range: 1.0mm-3.5mm
- Power Supply: 380V/50Hz/3Phase
- Material Type: Carbon Steel, Stainless Steel, Alloy Steel
- Control System: PLC Control
- Square Tube Range: 70*70mm-10*10mm
- Forming Method: Roll Forming
- Tube Length: As Your Require
- Welding Method: High Frequency Welding
- Highlight: **Durable Welded Tube Mill Line, Welded Tube Mill Line 380V**

Product Description

Frequency Welding Carbon Steel Tube Mill Line With PLC Control And Square Tube Range 10*10mm-70*70mm

Product Description:

The Welded Tube Mill Line is known for its exceptional quality and durability. It is designed using the latest technology and high-quality materials to produce efficient and reliable results. The machine is built to last and can withstand heavy usage, making it a cost-effective solution for industries looking to produce high-quality tubes.

The Square Tube Range produced by the Welded Tube Mill Line ranges from 70*70mm-10*10mm. This range is perfect for industries that require square tubes of different sizes for their production processes. The machine is capable of producing tubes of various dimensions, making it a versatile solution for different industries.

The Welded Tube Mill Line is designed to handle different strip widths ranging from 300mm-1600mm. This feature allows industries to produce tubes of various sizes and dimensions. The machine is equipped with state-of-the-art technology that ensures precise and accurate results, ensuring that the tubes produced meet industry standards.

The Welded Tube Mill Line features a Cold Saw Cutting method that ensures efficient and precise cutting of tubes. This method ensures that the tubes produced have smooth edges and are free from burrs, making them suitable for various applications. The Cold Saw Cutting method also ensures that the tubes are cut to the required length, making it a time-efficient solution for industries.

The Welded Tube Mill Line uses High-Frequency Welding to produce high-quality tubes. This welding method ensures that the tubes produced are strong and durable, making them suitable for various applications. The High-Frequency Welding method also ensures that the tubes produced have a smooth surface finish, making them suitable for applications that require a polished appearance.

In conclusion, the Welded Tube Mill Line is a state-of-the-art machine that is perfect for industries looking to produce high-quality welded tubes. Its Straight Seam Tube Milling Machine design ensures that the tubes produced are of exceptional quality and meet industry standards. The machine's versatility, durability, and efficiency make it a cost-effective solution for different industries.

Features:

Product Name: Welded Tube Mill Line

Tube Diameter Range: 20mm-90mm

Square Tube Range: 70*70mm-10*10mm

Cutting Method: Cold Saw Cutting

Strip Width: 300mm-1600mm

Material Type: Carbon Steel, Stainless Steel, Alloy Steel

Also known as: High Frequency Welded Tube Line, Tube Welding Machine, Tube Welding Machine

Technical Parameters:

Power Supply	380V/50Hz/3Phase
Control System	PLC Control
Wall Thickness Range	1.0mm-3.5mm
Strip Width	300mm-1600mm
Cutting Method	Cold Saw Cutting
Tube Length	As Your Require
Roller Material	Cr12MoV
Welding Method	High-Frequency Welding
Forming Method	Roll Forming
Tube Diameter Range	20mm-90mm

Applications:

The delivery time for these Pipe Welding Lines is 60 workdays and payment terms can be made through T/T or L/C. The supply ability is 30 sets per month. The power supply required for these machines is 380V/50Hz/3Phase. They are equipped with a PLC Control System to ensure maximum precision and efficiency.

The Strip Width range for these machines is 300mm-1600mm and the Tube Diameter Range is 20mm-90mm. The Roller Material used in these machines is Cr12MoV, which ensures that the welded tubes have a smooth surface and are of good quality.

These Welded Tube Mill Lines are suitable for a variety of application occasions and scenarios such as construction, furniture, automotive, and many more. The machines are designed to provide a seamless welding process and produce high-quality tubes. They are ideal for companies that require a steady supply of welded tubes for their production processes.

Support and Services:

The Welded Tube Mill Line product technical support and services include:

- Installation and commissioning of the equipment
- Operator training and technical training
- Regular maintenance and inspection services
- Troubleshooting and repair services
- Spare parts and component replacement services
- Upgrades and modernization services to improve performance and efficiency

Packing and Shipping:

Product Packaging:

All components are securely packed in wooden crates to prevent any damage during transport.

Each crate is labeled with the product name, quantity, and customer information for easy identification.

Shipping:

We provide worldwide shipping via sea, air, or land transport.

Shipping costs and transit times may vary depending on the destination and mode of transport selected.

We work with reputable shipping companies to ensure timely and safe delivery of our products.

Customers are responsible for any applicable import duties and taxes.
