

## Carbon Steel / Alloy Steel Welded Tube Mill Line 380V 50Hz 3Phase

### Our Product Introduction

#### Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: Hangzhou Maxwell
- Certification: CE, ISO9001
- Model Number: Welded Tube Mill
- Minimum Order Quantity: 1 Set
- Price: USD150,000--USD600,000
- Packaging Details: Nude Packing In a 40 Feet Container
- Delivery Time: 60 workdays
- Payment Terms: T/T; L/C
- Supply Ability: 10 Set per Mon

#### Product Specification

- Tube Diameter Range: 20mm-127mm
- Wall Thickness Range: 1.0mm-5.0mm
- Welding Seam Detection: Laser Seam Tracking System
- Power Supply: 380V/50Hz/3Phase
- Tube Length: As Your Require
- Production Speed: 20-50m/min
- Material Type: Carbon Steel, Stainless Steel, Alloy Steel
- Forming Method: Roll Forming
- Highlight: **Carbon Steel Welded Tube Mill Line,  
Alloy Steel Welded Tube Mill Line,  
Welded Pipe Mill Line 380V**

## Product Description

### Carbon Steel Stainless Laser Welded Tube Mill Line With Forming Speed 20m/Min To 50m/Min

#### Product Description:

Our Pipe Welding Line is equipped with a 380V/50Hz/3Phase power supply, making it suitable for industrial use. This also ensures that the machine is energy-efficient, making it a cost-effective solution for your pipe-making needs.

Our Pipe Welding Line uses Cold Saw Cutting as its cutting method, which ensures precision cuts and minimal waste. The Cold Saw Cutting method also guarantees that the pipe's edges are clean and smooth, making it easier to connect to other pieces.

Our Pipe Welding Line can produce pipes of any length, depending on your requirements. This makes it versatile and adaptable to any project you have in mind.

The production speed of our Pipe Welding Line ranges from 20-50m/min, making it one of the fastest Tube Welding Machines in the market. This makes it ideal for large-scale projects that require a significant amount of pipes in a short amount of time.

Our Pipe Welding Line is easy to operate and maintain, thanks to its user-friendly interface and durable components. This ensures that your production process runs smoothly and efficiently, without any unnecessary downtime.

In conclusion, our Pipe Welding Line is the perfect solution for your pipe-making needs. With its High Frequency Welding method, 380V/50Hz/3Phase power supply, Cold Saw Cutting method, ability to produce pipes of any length, and fast production speed, it's the ultimate Tube Welding Machine in the market.

#### Features:

Product Name: Welded Tube Mill Line

Welding Method: High Frequency Welding

Material Type: Carbon Steel, Stainless Steel, Alloy Steel

Square Tube Range: 70\*70mm-10\*10mm

Forming Method: Roll Forming

Tube Diameter Range: 20mm-127mm

Keywords: Straight Seam Tube Milling Machine, Steel Tube Welding Mill, Tube Welding Machine

#### Technical Parameters:

Pipe Welding Line	Steel Tube Welding Mill
Material Type	Carbon Steel, Stainless Steel, Alloy Steel
Wall Thickness Range	1.0mm-5.0mm
Welding Seam Detection	Laser Seam Tracking System
Control System	PLC Control
Power Supply	380V/50Hz/3Phase
Roller Material	Cr12MoV
Tube Length	As Your Require
Cutting Method	Cold Saw Cutting
Tube Diameter Range	20mm-127mm

Forming Method	Roll Forming
----------------	--------------

### Applications:

This Steel Tube Welding Mill Line is suitable for producing tubes made of carbon steel, stainless steel, and alloy steel. The welding method used is high frequency welding, which ensures a strong and durable weld. The Laser Seam Tracking System ensures that the welding seam is accurate and precise, resulting in high-quality tubes every time. The Square Tube Range for this product is 70\*70mm-10\*10mm, making it perfect for a wide range of applications.

The Tube Welding Machine is ideal for use in a variety of occasions and scenarios. It can be used in the construction industry to produce tubes for building frames, scaffolding, and handrails. It can also be used in the automotive industry to produce tubes for exhaust systems, fuel lines, and brake lines. In addition, this product can be used in the furniture industry to produce tubes for chair frames, tables, and bed frames. The possibilities are endless with the Steel Tube Welding Mill Line from Hangzhou Maxwell.

### Support and Services:

The Welded Tube Mill Line product technical support and services include:

[Installation and commissioning of the equipment](#)

[Training for operators and maintenance personnel](#)

[24/7 technical support and troubleshooting](#)

[On-site inspection and maintenance services](#)

[Upgrades and retrofits for existing equipment](#)

[Spare parts and components supply](#)

[Documentation and technical manuals](#)

Our team of experienced engineers and technicians is dedicated to providing high-quality technical support and services to ensure the optimal performance of your Welded Tube Mill Line.

### Packing and Shipping:

Product Packaging:

[All components of the Welded Tube Mill Line are securely packed in wooden cases to prevent damage during transportation.](#)

[The cases are labeled with the product name and specifications for easy identification.](#)

[A packing list is included in each case for inventory purposes.](#)

Shipping:

[The Welded Tube Mill Line will be shipped via sea or air transport based on customer preference and the delivery timeline.](#)

[Shipping costs will be included in the final invoice.](#)

[The customer will be provided with a tracking number to monitor the shipment status.](#)

[Delivery timelines will be communicated with the customer prior to shipping.](#)
