Product Description

Product Description:

The Roll Forming Machine is available in several roller stations, ranging from 13 to 18 stations, giving you the flexibility to choose the model that best suits your production needs. This product type is designed specifically for the production of glazed tile and corrugated panel sheets, making it ideal for the construction industry.

With a PLC control system, this Roll Forming Machine is easy to operate, and you can be sure that it will deliver consistent and accurate results every time. The control system allows you to adjust the settings to suit your production needs, making it highly customizable and versatile.

The Metal Sheet Roll Forming Machine is also available in a Floor Decking and Wall Panel Double Layer Roll Forming Machine, making it even more versatile and suitable for a wider range of applications. This product type is designed to produce high-quality floor decking and wall panels, making it ideal for use in the construction industry.

If you're in the market for a high-quality Roll Forming Machine that can produce glazed tile and corrugated panels quickly and efficiently, then the Metal Sheet Roll Forming Machine is the perfect choice for you. With its superior build quality, easy-to-use control system, and versatility, it's an excellent investment for any business looking to increase production and efficiency.

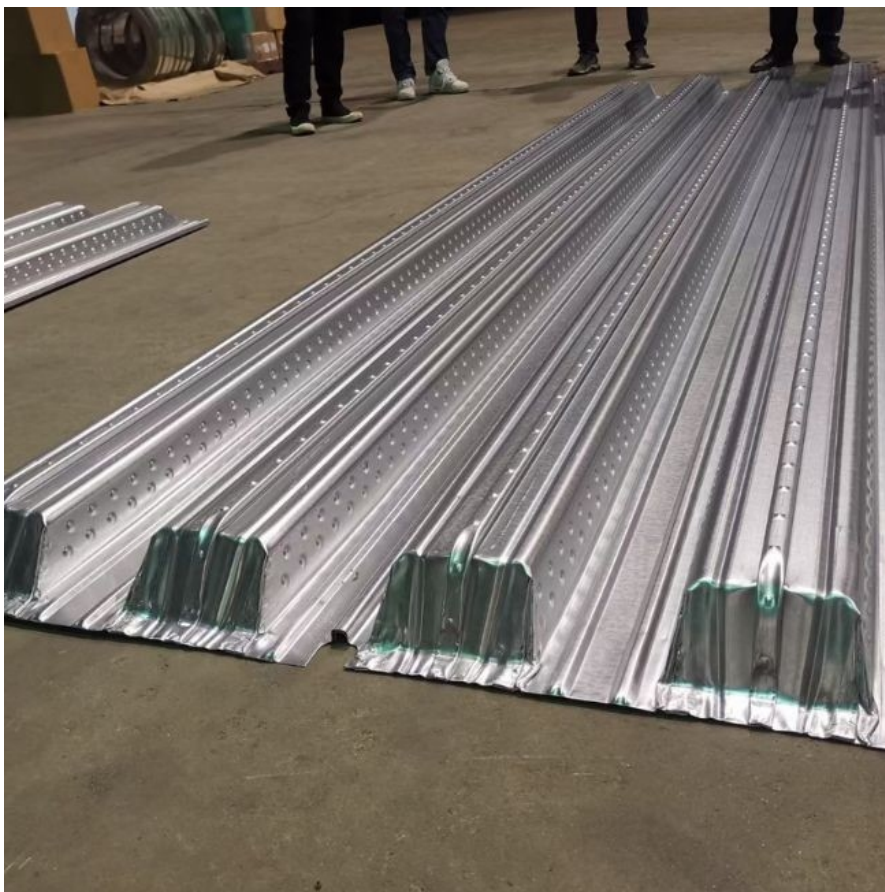

Overall, the Metal Sheet Roll Forming Machine is a top-of-the-line product that is built to last and deliver excellent results. Whether you're looking for a glazed tile and corrugated panel Roll Forming Machine or a Floor Decking and Wall Panel Double Layer Roll Forming Machine, this product type is the perfect choice for you. So why wait? Invest in a Metal Sheet Roll Forming Machine today and take your business to the next level!

Applications:

The Metal Sheet Roll Forming Machine is designed to cater to different application scenarios, making it a versatile product. One of the application scenarios for the product is for the production of double-layer roll forming machines. These machines are ideal for the production of glazed tiles and corrugated panels. The machine has a hydraulic cutting method and can produce up to 10-15 meters per minute, depending on your requirements. The roller stations for the machine range from 13-18 stations, making it ideal for different production needs.

The Metal Sheet Roll Forming Machine is suitable for different occasions, such as roofing and wall cladding, among others. The machine can be used in the production of glazed tile and corrugated panel roll forming machines for roofing and wall cladding applications. The product is made from high-quality materials such as PPGL, PPGL, and AL, ensuring the durability and longevity of the machine. Additionally, the machine comes with a one-year warranty, giving you peace of mind when purchasing the product.

Support and Services:

We offer comprehensive technical support and services to assist with the installation, operation, and maintenance of the machine. Our team of experienced technicians is available to provide training, troubleshooting, and repair services to ensure optimal performance and minimize downtime.

We also offer customization services to meet specific requirements and provide timely delivery and installation services to ensure a smooth and hassle-free experience for our customers.

Packing and Shipping:

Product Packaging:

The Metal Sheet Roll Forming Machine will be carefully packaged in a sturdy wooden crate to ensure safe transportation. All necessary precautions will be taken to protect the machine during shipping.

Shipping:

The machine will be shipped via a reliable and trusted courier service to ensure timely delivery. Shipping costs will be calculated based on the destination of the machine and will be added to the final price of the product. Customers will be provided with a tracking number to monitor the progress of their shipment.

FAQ:

Q1: What is the brand name of the Metal Sheet Roll Forming Machine?

A1: The brand name of the Metal Sheet Roll Forming Machine is Hangzhou Maxwell.

Q2: Where is the Metal Sheet Roll Forming Machine manufactured?

A2: The Metal Sheet Roll Forming Machine is manufactured in Zhejiang, China.

Q3: Does the Metal Sheet Roll Forming Machine have any certification?

A3: Yes, the Metal Sheet Roll Forming Machine has CE and ISO9001 certification.

Q4: What is the minimum order quantity for the Metal Sheet Roll Forming Machine?

A4: The minimum order quantity for the Metal Sheet Roll Forming Machine is 1 set.

Q5: What is the packaging and delivery time for the Metal Sheet Roll Forming Machine?

A5: The Metal Sheet Roll Forming Machine is packaged in nude packing in a 40-foot container and the delivery time is 45 workdays.

Q6: What are the available payment terms and supply ability for the Metal Sheet Roll Forming Machine?

A6: The available payment terms for the Metal Sheet Roll Forming Machine are T/T and L/C. The supply ability is 30 sets per month.
